WINTHROP PRODUCTS LIMITED

Britain's
newest
factory
for tissue
products—
opens new
era for
retailers

The opening of this magnificent new Kimberly-Clark factory at Aylesford, Kent, for the production of cellulose wadding is a major development in the expansion of the retail market for tissue products.

Planned in co-operation with the Reed Paper Group, this new plant incorporates the latest manufacturing techniques

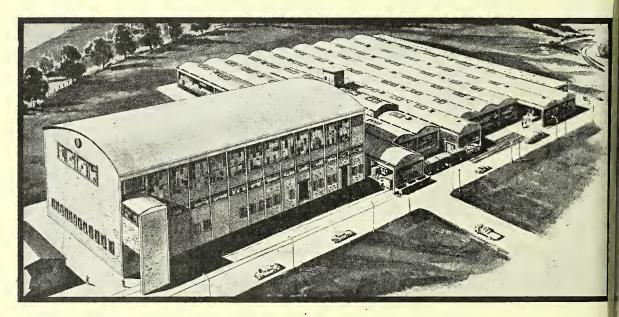

and is the most modern of its kind in Europe.

From Aylesford will come the extra wadding needed for the increased production of a long line of famous branded products—Kleenex tissues, Delsey toilet tissue, Hi-Dri paper towels, Kleenex Medical Wipes, Kotex sanitary towels—tissues for every conceivable purpose, from paper squares to neck towels for hairdressers.

With its increased production facilities this new Kimberly-Clark plant will allow the most rapid expansion of the whole tissue market and signals a new era of ever-mounting sales

and prosperity for Kimberly-Clark stockists.

The planned development of new factories like that at Aylesford, with matching marketing and advertising services to increase public demand, are an integral part of Kimberly-Clark's plan to raise retailers' profits to a new high level in this country.

New uses, too, are constantly being sought for cellulos wadding, and from this new Aylesford factory will com

-radically different

The external appearance of a GLEDHILL Cash Register is not much unlike other makes—keys, price figures and cash drawer. Inside, however, the operative mechanism is rather revolutionary in design. Many ingenious and patented features, exclusive to Gledhill, contribute to the accuracy, reliability and trouble-free service of this famous machine. Five distinct types cater for the special needs of various businesses: these are described and illustrated in the Catalogue which will be sent on request.

infections than any other antibiotic

TRADE MARK **'GATHOPEN TABLETS**

NOVOBIOCIN AND PENICILLIN G

Combines the dramatic new antibiotic 'CATHOMYCIN' with Penicillin G, the most widely used antibiotic ever developed; this alliance achieves the added advantages of both, while eliminating gaps in coverage presented by either antibiotic alone.

Compare these advantages

- Proved effectiveness in the largest number of important infections including those caused by resistant staphylococci and proteus.
- **2** Therapeutic bactericidal blood levels are achieved rapidly.
- Exceptionally well tolerated; sensitivity reactions are rare at recommended dosage.
- No yeast or fungal super-infections or any antibiotic-induced enteritis, vaginitis or proctitis have been reported following 'CATHOPEN'.
- No problems of cross-resistance have been encountered with 'CATHOPEN'.
- The normal intestinal flora is not disturbed by 'CATHOPEN'.

Some important infections where 'Cathopen' is indicated

DOSAGE: for adults - two tablets q.i.d.; for children under 100 lbs. - dosage in proportion to weight (e.g. one tablet q.i.d. for a child weighing 50 lbs.).

How Supplied 'Cathopen' tablets are supplied in bottles of 16 and 100.

Each tablet contains: 'Cathomycin' (Novobiocin) . . . 125 mg. Potassium Penicillin G . . 125,000 units

Basic N.H.S. Prices: 16's, 26/8d; 100's, 160/-d.

ORESSING AND CONDITIONING

CREAM FOR THE HAIR

SALES! SALES! yet more SALES! —and PROFIT FOR YOU

VITAPOINTE'S Advertising this year will be greater than ever. This really outstanding big-space national campaign has already started. Profit by it by stocking, recommending and displaying Vitapointe NOW.

Just consider, quickly, these oustanding advantages which only Vitapointe offers:—

TO YOU

PROFIT, more than generous, especially on Direct Display Terms.

ADVERTISING: Frequent large spaces, including full pages, in the leading National Women's Magazines, National Sunday and National Daily Newspapers. The advertisements will be seen and read by at least 31,420,000 (thirty-one and a half million) women each and every month, for the whole twelve months.

DISPLAY MATERIAL: Full-colour showcards, and special display outers featuring Belinda Lee, and which are designed to give maximum display value in minimum counter, shelf or window space, are available.

TO YOUR CUSTOMER

VITAPOINTE: conditions the hair to shining, flashing beauty in just one minute.

VITAPOINTE: needs no shampoo before use. You just brush it on.

VITAPOINTE: restores the tired perm, and encourages natural waves.

VITAPOINTE: stops frizziness, and split ends.

VITAPOINTE: is not greasy, but is absorbed by the hair, correcting sebum deficiency whether caused by physical condition or exposure to sun, sea-air, wind or industrially-polluted atmosphere.

VITAPOINTE: retails at only 3/9 for two months'

Dangerous Drugs

SCHEDULE BROUGHT UP TO DATE

REGULATIONS have been made bringing up to date the schedule of drugs, the manufacture, sale, possession and distribution of which is controlled by the Dangerous Drugs Regulations, 1953.

An amendment is made to Regula-tion 17 of the 1953 Regulations to make it clear that a separate register or part of a register must be used for entries made for each new drug brought under control after the date of the new Regulations. And revised wording has been used in Regulation 17 (1) (b) in order to make it clear that a separate register or part of a register need be kept only for drugs actually obtained or supplied. An amendment makes it clear that the relaxations in the re-lurements for making entries in the register (Regulation 17, 2 (a) of the 1953 Regulations) by medical practi-tioners and authorised sellers of poisons are confined to drugs supplied by them. The new schedule is given on p. 496. A separate register or separate part of a register must be used for entries nade with respect to each of the classes of drugs and preparations specified in aragraph 1 of the scule and for hat purpose the drugs in each subaragraph other than No. 44 constitutes class and each ester, ether or derivaive specified in the said paragraph 44 ogether with its salts and any prepara-on, admixture, extract or other sub-ance containing it or its salts, con-titutes a class. It should be noted that separate register or part of a register ill now be required for: Levorphanol nd racemorphan, both of which were ormerly known as methorphinan; and r levomethorphan and racemethor-

The Regulations which came into fect on May 1 are the Dangerous rugs Regulations, 1957 (S.I., 1957, o. 7(4). Copies are obtainable from M. Stationery Office, price three-nce.

Penicillin Lozenges

NQUIRY ON MAXIMUM STRENGTH?

IDDLESEX Executive Council enred at a meeting on April 17 its pharaceutical service committee's suggestream that the question of the maximum tount of penicillin permissible in nicillin lozenges should be considered the Ministry of Health. The British armacopeia stipulates only the minim penicillin content of penicillin enges. The service committee's report

referred to a case in which lozenges had been found to contain twice the minimum quantity of penicillin required. The contractors wrote that what at first seemed to be a large excess of active ingredient was, in fact, a deliberate addition to compensate for storage losses.

N.P.U. Officers

ELECTED AT EXECUTIVE MEETING

THE following officers of the National Pharmaceutical Union were elected for 1956–57 at a meeting of the Executive held in London, April 24 and 25: Chairman, Mr. P. D. J. Spaanderman; Vice-chariman, Mr. H. G. Moss; Treasurer, Mr. S. J. Stearn, The Chairman, on election, paid tribute to Mr. Allen Aldington (retiring chairman) for his services during a year of office in which he had contributed greatly of his time and energies to the promotion of the work of the Union and its associated organisations.

Safety in the Factory

EXHIBITION AT BIRMINGHAM

THE 1957 Safety and Factory Efficiency Exhibition organised by the Birmingham Industrial Safety Group is being held at Bingley Hall, Birmingham, June 14–21. Part of the exhibition is being staged by the United Kingdom Atomic Energy Authority to give a comprehensive picture of the Authority's activities. Coincident with the exhibition the group are holding a congress, June 14–16, the subject of which is "Atom 1957."

Examination Results

ENGLAND AND SCOTLAND

THE following candidates satisfied the examiners in the Intermediate examination held by the Pharmaceutical Society in England and Wales in April:—

Allison, J. M., Gloucester; Anisfeld, Jacqueline, Finsbury Park; Corney, Pamela M., Lewisham; Dewsbury, A., Barnsley; Douglas, H. D., Northampton; Evans, D. D., Stratford; Hartley, Roberta G., Balham; Isaacs, M. J., Hendon; Judge, F. M., Forest Hill; Mendus, Janet M., St. Davids; Pearce, E. W.,

INTERNATIONAL PHOTOGRAPHERS: Members of the Wholesale Photo Finishers Association at the International Photographic Exposition, Washington, D.C., U.S.A., recently, Left to right: Pako representative; Messrs. G. P. C. Vallance (treasurer, W.P.F.A.); Alistair Inglis (president); and James Entwisle (national council member).

Chippenham; PROBERT, Janet M., Bristol; SMITH, Shirley M., Wembley; STITTLE, J. C., Mildenhall; WHEELER, C. D., Cardiff.

The following candidates satisfied the examiners in the Intermediate examination held by the Pharmaceutical Society in Scotland in April:—

BINGHAM, Pauline, Rotherham; BROWN, M. R., Edinburgh; BULLMAN, Brenda D., Sunderland; CALDWELL, I. McD. W., Glasgow; COULTHARD, Carole M., South Shields; EDWARDS, D. G., Llangollen; FAIRWEATHER, S., Dundee; FORD, F. B., Holywell; FRATER, C. W., Galashiels; GERSTENBERG, Camilla C., Aberdeen; MACHEN, D. P., Rotherham; MICHIE, J., Buckhaven; NORTH, A. V., Loughborough; POND, R. N., Melton Mowbray; RAWSTHORNE, Averil P., Cheadle; SHARP, B., Consett; SHAW, Amy M., Pentre Maelor.

Automatic Sampler

GIFT TO LONDON HOSPITAL

AN automatic sample-changer Geiger counter of advanced design has been installed in the Department of Bacterial Physiology of the Wright-Fleming Institute of Microbiology, St. Mary's Hospital, Paddington. Built by an American electronics company specialising in radiation-detecting equipment, it is the gift of the Pfizer Corporation The installation consists essentially of three integrated automatic units: the samplechanger, the Geiger counter and the electronic printer. The equipment shows several novel features. The automatic sampler brings up thirty-five different sample-pans in numbered sequence. These sample-pans of stainless steel contain radioactively "labelled" samples. In the current research project on which the automatic sampler is being which the automatic sampler is being used by Dr. Rowley, head of the Bacterial Physiology Department, the "tagging" radio-isotope used is P32 (radioactive phosphorus), an element involved in the metabolic processes under study. Dr. Rowley and his associates are at present investigating the phenomena that are concerned in non-specific immunity.

Technical Libraries

IMPROVEMENT NEEDED AT COLLEGES

THE early appointment of qualified librarians to the larger technical colleges is recommended by the Minister of Education, Lord Hailsham, as part of the Government's drive to expand technical education. "Too many technical colleges are still poorly equipped with libraries, and too few are in charge of qualified librarians," said the Minister in a circular to local education authorities on April 15. From £500 up to £2,000, according to the size of college, it was recommended should be set aside as an annual allowance for the purchase of books and periodicals. A minimum of 3,000 volumes should be the stock target. The maintenance of an adequate library service was essential if students were to be trained to seek up-to-date information, to become independent workers rather than passive recipients of lecture notes, and to keep pace with scientific developments after they had passed their examinations and gone into the world at large.

Photo-journalism Group

NEW ORGANISATION FORMED

THE formation of a Photo-Journalism Group within the Royal Photographic Society was agreed by about fifty members of the R.P.S. at a meeting in London on April 16. The decision is being submitted to the Royal Photographic Society for recognition. A committee of four was elected and the convenor of the meeting, Mr. Reece Winstone, was elected Chairman of the Group. Mr. T. A. Wilkie, Guildford, was elected Secretary. The Group intends holding six monthly meetings a year from April to October, and in addition an autumn exhibition which may be open to nonmembers.

International Congress

HEAVY BOOKINGS FROM GERMANY

BOOKINGS from Germany are particularly heavy for the coming International Pharmaceutical Students' Congress to be held at Mosney, co. Meath, reland, from September 3 to 13. Large representative parties of delegates are also expected from Great Britain, Northern Ireland and the rest of the The Congress programme Continent. now completed by Mr. Bernard Tedders (chairman) and members of the local committee is as follows: -September 3, arrival and registration of deleber 3, arrival and registration of delegates at Mosney Holiday Camp. September 5, reception by the Lord Mayor of Dublin at the Mansion House, followed by tour of Dublin City. Evening, dinner and dance at Mosney. September 7, tour by bus from Mosney to the Mountains of Mourre September 9, official opening. Mourne, September 9, official opening, September 10, all-day bus tour of Wicklow and Glendalough. September 11, industrial tour of Dublin with visit to the Abbey Theatre in the evening. September 12, farewell ball at the Gresham hotel. The Congress can be attended by students, recently qualified pharmacists and assistants. Applications accompanied by a deposit of £2 should be addressed to Butlin's Holiday Camp, Mosney, co. Meath, Ireland, and the envelope marked on the top "International Pharmaceutical Students' Congress." The total all-in cost is £13 10s.

THE NORTH

Chemists and Druggists

SOCIETY'S ANNUAL MEETING

FOR the thirty-eighth successive year, Mr. F. Storey, C.B.E., was elected *President* of the Chemists' and Druggists' Society of Ireland, at the annual meeting held in Belfast on April 17. The annual report was submitted by Mr. H. McQuitty (secretary) and the financial statement by Mr. D. McBride (treasurer). Moving their adoption, Mr. Storey said that it was with great regret that they had to report the deaths of three members, Mr. J. Irwin, Dunmurry, Mr. W. Doig, Whitehouse, and Mr. A. Taggart, Ballymena. Mr. Irwin's death was a severe loss to the Society. He was a member of the executive committee for a long time, one of the audi-

tors and was the Society's representative on the Council of the Pharmaceutical Society of Northern Ireland. Mr. Doighad been a member of the executive committee and a lifelong member, as had been his father, and also was a member of the Council of the Pharmaceutical Society of Ireland for many years. Mr. Taggart was a lifelong member of the Society. Mr. Storey referred to the illness of Mr. F. Boyle, and wished him a speedy recovery. Mr. M. Watson had been appointed druggist representative to the Pharmaceutical Society of Northern Ireland in place of the late Mr. J. Irwin, Mr. Storey spoke of the work of the Benevolent Fund committee. The new Pharmacy and Poisons Act had been passed and also the Revaluation Act. High valuations had come as a shock, especially for business premises. Concluding he said that the increased charges for freight and passenger services would adversely affect trade and commerce in the country and add to the cost in living, but it appeared that nothing could be done about it and he hope that there would be no further increases. The outlook for prosperity in the country was somewhat blurred by the Sue impasse and strikes. On the re-election of Mr. Storey as president, Mr. R. McCann (who seconded the nomination) said that members were please to see that Mr. Storey had bee appointed chairman of the Post Offic Advisory Council (N.I.). Other officer elected were:—Vice-presidents, Messr F. J. Boyle, F. T. Smith and T. McDowell; Treasurer, Mr. D. McBridd Secretary, Mr. H. McQuitty.

TOPICAL REFLECTIONS

By Xrayser

Guiding the Young

Careers talks and exhibitions are becoming increasingly popular as a means of helping scholars to make up their minds as to their vocation You report (p. 452) a three-day careers exhibition at Epsom, opened by Lord McCorquodale, chairman of the British Productivity It seems, from the report mentioned, that the stands were sponsored by large manufacturing and retail interests, and that retail pharmacy was represented by a well-known multiple firm. Obviously the purpose of the retail firm was to attract recruits to its own organisation, for no one would expect it to go to the expense of a special stand merely to interest the scholars in retail pharmacy in general. But why was it left to a firm to present pharmacy? The Pharmaceutical Society—surely the authentic source of information—participated in such an exhibition in Brockenhurst last June. At the time I wrote (C. & D., June 23, 1956, p. 537): "It is of the first importance that the public should learn of pharmacy as a career through the offices of the Pharmaceutical Society, and it would be a good thing if the Society made itself wholly responsible for the propagation of all matter relating to pharmacy as a career. It is not in the interest of the Society or of the public that the information should be of a sectional character." Are the Society's public relations inadequate?

Council Election

The election addresses, with notes of their careers, of those offering themselves for the vacancies in the Pharmaceutical Society's Council, will assist members in their choice of candidate. An election address is not an easy thing to write, and it may be, as one candidate suggests, that only by having a full report of the Council's public business would it be possible to use a vote with intelligence, though it might be thought that there is a negative side to the suggestion. One could reasonably and intelligently decide on such evidence which of the retiring members should go back, and which should find another sphere for their activities. but the new candidate would not gain except by the default of others. Nevertheless, the reports of the Council proceedings are at present no guide to the electors. Consequently, it behoves those with an election paper before them to study the material provided (p. 454 et seq.). "Business transactions demand mature consideration" was a copy book aphorism of the Victorian age, and it applies to those who undertake to act for their fellows. We do not know enough of our representatives' work, which tends to be unwept, unhonoured and unsung.

Roman Hospitals

In his History of Medicine, Dr. Douglas Guthrie records that there exists near Dusseldorf a perfect example of a Roman military hospital, dating from about A.D. 100, and remarks on the fact that it is constructed on the corridor system in accordance with modern ideas. Hitherto it has been thought that no example existed in this country, but reports from Perthshire, where excavation is going on at Inchtuthil, reveal that a legionary hospital existed there on the banks of the Tay. Speaking to the Society of Antiquaries in Edinburgh, Professor Richmond described the layout of the hospital, which measured 200 ft. by 300 ft., planned about an oblong open court, and consisted of sixty small wards. Each ward accommodated not more than three beds, and the number of wards corresponded to the sixty centuriae into which a legion was divided. They are arranged in pairs flanking side passages, opening off a central circulation corridor. Professor Richmond remarked on the fact that the Romans realised the value of greater quietness and privacy, and that it has taken a long time to get back to the principle. Work has been going on for five years on the site, which is near Caputh, and situated in the grounds of Delvine House. The Roman stay in Britain was very long-about 400 years—and we may learn a good deal more when further excavations have taken place.

PROPRIETARY ARTICLES TRADE ASSOCIATION

President hints at an increase in subscriptions

MOVING the adoption of the annual report at the annual meeting of the Proprietary Articles Trade Association, held in London on April 11, THE PRESIDENT (Mr. L. D. Smith) emphasised that 1956 was a difficult and anxious year because of the introduction of the Restrictive Trade Practices Bill, However, matters had worked out better than could have been expected. Membership had maintained a satisfactory level and the members of the three sections had remained loyal and had given full support to the Association. It was gratifying that in the manufacturers' section membership showed an upward trend. There had been, and would again arise, circumstances in which the reaching of stances in which the reaching of decisions and the taking of concerted action—with resulting benefits to all members—had derived from the Association's first object, "the discussion of matters of common interest to those engaged in the proprietary articles trade." Similarly, opportunities occurred for the P.A.T.A. to do various things which were lawful and "in ous things which were lawful and "in the common interest of its members. Thus, the scope of the P.A.T.A. was not restricted to the important function of assisting manufacturer-members in the enforcement of their price-protection rights.

After referring to the revised constitution and rules, the president said that the result, he thought, had fully justified the council's decision. Having mentioned the usefulness of the Year Book and Quarterly Record, the president said that, when the year started, the prospect of celebrating suitably the sixtieth anniversary of the foundation of the P.A.T.A. was not bright. However, an appropriate and successful celebration was held in November 1956. The presentation by the board of Allen & Hanburvs, Ltd., and its managing director (Mr. C. W. Maplethorpe), of the presidential badge of office, which he was now wearing, was greatly appreciated by the council and it was particularly fitting that the first president to be invested with the Badge was his (Mr. Smith's) predecessor, Mr. Norman Dewey.

Increasing Expenses

Expressing regret at the unavoidable absence of Mr. R. G. Dyas (treasurer), the president said that the accounts showed that at the end of the year expenditure had exceeded income by a fairly substantial figure. That was unavoidable and due to causes outside the council's 'control. Expenses had increased and were increasing and although a report on the matter was not then being submitted the executive committee was examining the whole position and possibly would report its proposals to the Council in July. While not wishing to anticipate that report, the president though that it would be only right to say that those proposals might have to include a recommendation for increased subscriptions.

Concluding, the president thanked Mr. H. E. Chapman (secretary) for all the work he had done for the Associa-

tion during the year. Members would appreciate the difficulties with which the Association had been faced, but it might be that, with the exception of those who had the opportunity of seeing the volume of work that had been undertaken, members as a body did not realise the weight that had fallen on the secretary's shoulders. He also thanked, on the members' behalf, Mr. Payn, Miss Hobbs, Mr. Stead and all other members of the staff at the P.A.T.A. office for their services during the past year. The motion for adoption of the report was seconded and supported.

and supported. In the discussion which followed, MR. P. G. FLOOD (Ferris Chemists (London), Ltd.) said that retail chemists were vitally concerned with price cutting, and he was delighted to see the steps that had been taken recently (see C. & D., March 30, p. 339). He understood that an injunction had been obtained for certain articles on the P.A.T.A. list, and asked if that could be extended to cover all the articles on the list. Mr. Price Holmes (secretary, Beecham Group, Ltd.) replied that the Act did not permit the Group to get an injunction in respect of any goods except those manufactured or distributed by the Group. The three actions were taken against J. Mindel, Ltd., for the price cutting of Brylcreem, Lucozade and Maclean's tooth-paste, and zade and Maclean's tooth-paste, and having done so the components of the Group were able to get an injunction which covered all the other products of the companies which made those three specific products. That was expressly permitted by the Act. He understood that the wider procedure referred to by Mr. Flood was under consideration. Mr. C. J. Greenland (Jeves-Ibco Sales, Ltd.) said he also wished to congratulate the Beecham Group on the action they had taken. Group on the action they had taken. Members had watched it with interest, and were gratified at the outcome. He thought that in taking the action the Beecham Group had the appreciation of all the manufacturer-members; and considered the outcome to be the "red to the price cutter.

The annual report and financial statement were unanimously adopted and votes of thanks to the president, the secretary and staff were accorded.

Quarterly Meeting of Council

The quarterly meeting of the council of the P.A.T.A. was held on April 11, the president (Mr. L. D. Smith) in the chair. After the president had referred to the death of Mr. Ronald Gower who for thirty years until his retire. who, for thirty years, until his retirement in 1951, had represented Butler & Crispe, Ltd., on the wholesale section, the council stood in silence for a minute. Mr. Smith then welcomed new members, Messrs. E. Draper and K. L. Haigh (County Laboratories, Ltd., and Barclay & Sons, Ltd., respectively). THE SECRETARY reported that the P.A.T.A. Year Book, 1957, had been distributed and that it was proposed to keep it up to date by having reprinted and included in it the supplements which appear in the Quarterly Record. The council received and approved a report on action taken by the Association in assisting manufacturer-members in matters connected with the notification and enforcement of their resale price conditions. At the request of individual members, certain price cutters had been approached in accordance with the procedure recommended by the council's legal advisers with whom close contact was being maintained. The President referred to the first action in the High Court directly affecting members of the Association (see C. & D., March 30, p. 343). It was thought that that case provided a useful example to other manufacturers of the steps which they were empowered to take. The council gave formal approval to the annual report and financial statement to be submitted for adoption at the annual meeting (see above). It was agreed that the next council meeting should be held on July 11. At a luncheon pre-ceding the meeting Jord Mancrof (Parliamentary Secretary, Ministry of Defence) and Mr. E. M. Price Holmes (secretary, Beecham Group, Ltd.) were the guests of the council.

PHARMACY IN OLD PORTSMOUTH

Posset, plague and bear's grease

SOME further sidelights into pharmacy in old Portsmouth were given to members of Portsmouth Branch of the Pharmaceutical Society on April 9 by Mr. L. J. Chamberlain (a member of the Pharmaceutical Society's History of Pharmacy Committee and a past-chairman, Portsmouth Branch of the Society). Mr. Chamberlain described how, in the late seventeenth century, Portsmouth fell victim to the plague, which was treated by a "posset." That constituted a draught of about 2 pints, comprising one part milk curdled with two parts ale and one part vinegar, boiled together with various herbs and roots. Posset was administered from a posset pot, a fine example of which in polychrome Lambeth delft dating from

1720 was exhibited to the audience by Mr. Chamberlain.

Bear's grease was fashionable as a hair dressing in the early 1800's, and Mr. Chamberlain produced severa fine examples of coloured bear's greas pot lids, and was also able to quot several advertisements for the produc which had appeared in local papers. About 1840 many patent medicine were also advertised locally, includin Price's Golden Oil of Macassar, Frank's specific solution of copaiba, Cheddon famed herbal tonic pills, Scott's biliou and liver pills—"the genuine ones i a square green package," Jacob's pul monic wafers and Morrison's pills. The advertisement for the latter specific that "no chemist or druggist is authorised to sell this medicine." Mr. Cham

berlain remarked that it was interesting to learn that from 1830 to 1840 Morrison's pills yielded no less than £60,000 in medicine stamp duty. The advertisement for those pills quoted: "If all your hair should tumble off, you twill grow again—you'll never need a wig." Mr. Chamberlain quoted several local nostrums of the period 1870-80, mentioning Rastrick's never-failing hair restorer, Spear's syrup of camphor and quinine, Stockman's cholera and diarrhea mixture, Trollope's sedative teething powders, Hackman's compound quinine pills.

In 1849, a local paper carried an advertisement for the Plantagenet guard razor, which claimed that "the most shaking hand need not fear to hold it whether shaking from age, infirmity or potations overnight." Was that the forerunner of the safety razor? asked Mr. Chamberlain. There were also records to show that in 1862 water was sold in the streets of Portsmouth at halfpenny

a bucketful.

Turning to the second half of the nineteenth century, Mr. Chamberlain produced a map which he had prepared, showing the disposition of pharmachemistry. macies in Portsmouth at that time. In 1881 the population was about 128,000 increasing to about 155,000 by 1891. It was interesting to note that since about 1900 the population had increased by about 43 per cent, but the number of pharmacies had increased by only 18 per cent.

In 1901 a professional journal carried an article on opening a pharmacy, wherein it was stated that £400 was needed to do the job properly, which sum included about £150 for the shop fitting, 291 shop rounds were advocated for use in the shop itself, and a further

156 for the dispensary.

In 1909 the Portsmouth Pharmacists'

Association was founded-some fourteen years before the foundation of the local Branch of the Society. From its inception the Association took a keen interest in the education of apprentices, and in all pharmaceutical matters, so much so that, in July 1911, a deputation from the Association waited upon Lord Charles Beresford, the senior M.P. for Portsmouth, with regard to Section 14 of the then new National Health Insurance Act. That section dealt with the dispensing of medicines under the Act, and the deputation wanted assurances that the people vaguely referred to were in fact chemists. That proved to be so in the end.

In 1908 a pharmacist, the late Mr. F. G. Foster, was elected mayor of Portsmouth, and in the same year opened the Municipal College, later to be the home of pharmaceutical training. In 1911 Mr. Foster was elected an Alderman of Portsmouth, and in that year also, Portsmouth was visited by the British Pharmaceutical Conference. The cost of a book of tickets was £1 1s, and the total cost of the Conference was

£297.

A meeting of the members of the Pharmaceutical Society in Portsmouth was held on November 29, 1922, when twenty-four members attended to hear an address by Mr. F. E. Bilson (treasurer to the Pharmaceutical Society) on the new local organisation. Animated discussion followed, resulting in a resolution being passed that the members undertook to form a Branch on the lines laid down by the Pharmaceutical Society. The first annual meeting of the Portsmouth Branch took place in April 1924, when the first officers and committee were elected. Nearly a year later, in February 1925, the Branch met to hear a talk by Mr. Keall (a member of Council) on the new Dangerous Drugs Act.

At the second annual meeting, held in 1925, members were acquainted with details of the part-time classes for apprentices, which had been arranged at the local College. The Committee later considered the matter of those classes, and agreed to recommend to the Branch that employers should allow apprentices six hours a week in which to attend. Outlining the history of pharmaceutical education in Portsmouth, Mr. Chamberlain said that classes in physics, mathematics, chemistry and zoology were started at the Technical Institute in Arundel Street, Portsmouth, in 1902-03, with a second year's combined course for pharmaccutical and medical students, who had already embarked upon their professions. In 1906 the vice-principal conceived the idea of a pharmacy department, and the first pharmacist (Miss E. Hooper, B.Sc., Ph.C.) was appointed to the staff. The present building—then known as the Municipal College—was opened in 1908 and records showed that materia medica, pharmacy and dispensing were taught on Wednesday afternoons by a local pharmacist. In 1919 the College was recognised by the Society for the training of ex-service men for the Society's examinations. In 1921 the local Association offered two book prizes, one being won by Mr. N. Francis, who was later the first student to register at the College for the Ph.C. course. In 1927-28 the pharmacy department at the Portsmouth Municipal College was formed, and recognised by the Society and London University.

The chairman's badge of office at present in use was presented to the Branch by Graham Tatford & Co., Ltd., in October 1950. The then president of the Society (Mr. A. A. Meldrum) invested the chairman for that year, Mr. N. Francis, with the chain of

COUNCIL CANDIDATES REPLY TO QUESTIONS

Education the main topic for discussion

A MEETING at which candidates for the Pharmaceutical Society's Council stated their views and answered quesions was held in London on April 17.
The meeting was held under the uspices of the London County Pharnaceutical Association.

The candidates (seven out of the welve contesting the election) were:— Messrs. A. Aldington, J. C. Bloomfield, M. Dowty, Stanley Durham, H. S. Grainger, K. Holland and J. F. McNeal. Among the questions and answers

vere the following:—
What are the opinions of the candidates

n the Society's education policy viewed gainst the background of the National lealth Service drug-testing scheme?

HOLLAND: The Council should get d of the drug-testing scheme.

DURHAM: The Ministry of Health sems to think that the analyst is better ualified than the pharmacist. The harmaceutical Society should, therere, aim at higher qualification rank-

g with that of the analyst!

McNeal: The testing scheme is an sult to pharmacy. Only complaints to play to pharmacy.

Mr. Durham is interested in having retail pharmacists as members of the Pharmaceutical Conference Executive, would that be a good thing

for pharmacy and the Conference?

Durham: The Conference is the shop-window of pharmacy. The general practitioners of pharmacy could make a more practical contribution to the Conference itself. Many Sheffield pharmacists are helping with formulas for the British Pharmaceutical Codex and are working out what happens to standard drugs from the time they leave the manufacturer until the time they reach the patient.

Should there be a scheme to compel degree students to take the subjects which would enable them to become members of the Pharmaceutical Society?

GRAINGER: It is not true that all degree students go into industry. In Wales all students take the degree course and many go into retail. The amount of pressure that the Society can bring to bear on degree students to become members is limited by the provisions of the Pharmacy and Poisons Act, 1933. It is not necessary to be a registered

pharmacist to be engaged in manufacturing. The Society is reducing the fee for examination of degree students in forensic pharmacy.

The retail outlet is the view the public takes of pharmacy, a good number of outlets are a disgrace to the profession, how can that lamentable state of affairs be remedied?

McNeal: By reserving sale of medicines to pharmacists who would then not have to concern themselves with

other sidelines.

Grainger: There are too many retail pharmacies with not enough pharmaceutical work to maintain them at a high professional level. Limitation must come in the end.

HOLLAND: The best solution is for local branch members to try to teach the bad housekeeper among them how to be clean. In the last resort the dirty and badly kept pharmacies should be closed down.

ALDINGTON: What would one of the retailers here tonight do if some of his colleagues came and told him how to run his pharmacy? The Society's inspectors are often the only contact be-

tween the member and the Society. That is bad but I feel that the problem of bad housekeeping can only be solved by someone in authority from the Pharmaceutical Society.

DURHAM: Not much can be done by

compulsion.

MCNEAL: If the control of medicines was diverted to pharmacy there would be insufficient pharmacies rather than too many. Give pharmacists the work to do and then come to see that they do it properly.

The scale of wages in pharmacy that goes out to the schools is not good enough, why did all the pharmaceutical bodies let the profession down over the National Health Service negotiations?

McNeal: As vice-chairman of the Joint Committee at the inception of the National Health Service I would say that the basis of payment in 1948 was fair but there have been arbitrary cuts since then.

There is no college in the Greater London area that provides a course for the Pliarmaceutical Chemist Qualifying examination. The nearest place providing such a course is at Leicester, what is the

Society doing about that?

GRAINGER: The colleges of advanced technology will be taking degree students only. It has been said that all degree students go into hospital and industry but that will be nonsense if all students are degree students for industry could not absorb them. The degree should be the qualification for retail. Bit by bit the Society's diploma will give way to the degree. The pharmacist requires the university degree of training.

BLOOMFIELD: One of the objects of the Society is the education of students. Under Mr. Grainger's thesis that would be given up.

GRAINGER: The Society gave it up

many years ago.

BLOOMFIELD: No, it did not.
ALDINGTON: Mr. Grainger's policy is wrong for the next forty years. It might be all right after that. Chelsea Polytechnic has been issuing a document to students which states that some students who take the degree or the Society's diploma are compelled to accept retail pharmacy as their life for the future and that is most distasteful to them. I leave that comment with you.

Dowry: Because the first item on the Society's charter is the education of students the Society should keep a firm

grip on it.

McNeal: I am in favour of higher qualification but fail to see how people with higher qualifications would be attracted to retail pharmacy even in forty years' time. The position of the retail pharmacist must be raised.

HOLLAND: Retail pharmacists are not cheap to get. On the whole pharmacy is a well-paid profession but more places must be provided for training retail

pharmacists.

DURHAM: Pharmacists should be trained to meet any future demands that the profession may put upon them.

GRAINGER: If we think that forty years is too far ahead for planning then we are being very unfaithful to our children and the profession that we have followed in our lifetime.

During Mr. Grainger's terms and the During Mr. Grainger's term on the

Council a Branch Representatives' motion on limitation of pharmacy was defeated, yet Mr. Grainger still holds that view. There was also a Welsh motion complaining about the lack of facilities for the diploma course and Mr. Grainger holds Welsh facilities up as a good example. Is it surprising that few motions are put forward from the branches?

GRAINGER: I was elected to the

Council to represent my own views and not those of branch delegates. I want to represent a profession that stands four-square with any other profession.

Dowry: The bulk of members of the Council consider that they represent the membership and try to wore the

the membership and try to voice the opinions of the branches.

ALDINGTON: A member of an executive of any pharmaceutical body has a

duty to his members.

PURCHASE-TAX-FREE DRUGS

Order exempts more items and reclassifies others

THE Purchase Tax (No. 1) Order, 1957 (published as Statutory Instruments, 1957, No. 678) extends the list of essential drugs and medicines exempt from purchase tax under the Purchase Tax (No. 3) Order, 1956 (S.I. 1956, No. 873) which is revoked. All drugs and medicines previously exempt under the revoked Order remain exempt under the new Order. The Order applies to goods which were despatched by

wholesalers and registered traders to unregistered traders on or after Apri 29, and to imported goods entered witl the Customs or delivered from bonder warehouse for home consumption or or after that date. Entries appearing fo the first time including amendments and extensions to existing entries are given in the accompanying table. Old en tries, now extended, are given in italics: --

Additions and Extensions	Exempted by virtue of entry	Maker
Head I 2-Bromo-2-chloro-1:1:1-trifluoroethane	Fluothane (On clinical trial)	ICI(P)
†Chlorhexidine and salts thereof, and solutions and creams which contain not less than 1 per cent. of any one of those substances as sole active ingredient and are prepared for veterinary use		
or for use in obstetrics HEAD II	Hibitane preps, I.C.I. udder wash	ICI(P) ICI(P)
Cetyldimethylethylammonium ethyl sulphate combined with tyrothricin	Collozets	Crookes Labs
sodium propionate and benzocaine *Chlorambucil *Chlorotrianisene	On clinical trial:	Wigglesworth
Dimethylethyl (3-hydroxyphenyl) ammonium salts *Edetic acid, and salts thereof *Ethinamate	Tensilon	Roche
N-Ethyl-3-piperidyl benzilate methobromide *Mercaptopurine N-Methyl-N-(beta-picolyl)-tropamide, and salts thereof	Pipta1	Benger's
*Mustine, and salts thereof Oxeladin, and salts thereof, whether or not mixed	hydrobromide	
with menthol	Pectamol Tussimol pasts.	B.D.H. B.D.H.
Tolbutamide	Rastinon Cynomel Tertroxin	Horlicks S.K.F. Glaxo
†N-(6-Acetoxythymyloxyethyl)dimethylamine hydro- chloride, whether or not mixed with dried ex- tract of belladonna root	Pan Sedon	Veritas
3 - Acetyl-10-(3-dimethylaminopropyl)phenothiazine maleate	Notensil	Benger's
mide 3-Chloro-10-[3-(4-methyl-1-piperazino)propyl] phenothiazine, and salts thereof †Cortisone and analogous steroid hormones and	Stemetil	М & В
esters thereof whether or not mixed with either or both of the following substances, that is to say, aluminium hydroxide and magnesium tri-	Co-Deltra	Merck Sharr
silicate	Co-Hydeltra Deltalone	& Dohme Ward Cassenn
*Crotamiton + Dextromethorphan, and salts thereof, whether or not mixed with ammonium chloride	Romilar expectorant	Roche

Additions and Extensions	Exempted by virtue of entry	Maker
Diethylthiambutene hydrochloride 4; 4'-Dinitrocarbanilide and 2-hydroxy-4: 6-dimethylpyrimidine molecular complex	Nicoxin Nicarbazin	M & B Merck Sharp & Dohme
Diphemanil methylsulphate		
Forminitrazole		
Glutethimide	Ct!-!	Warner
Hexetidine	Sterisil	warner
Hydrallazine, and salts thereof; dihydrallazine,		6"1
and salts thereof	Adelphane	Ciba
Hydroxychloroquine sulphate	On clinical trial	DC
Hydroxyzine, and salts thereof	Atarax	Pfizer
Levallorphan, and salts thereof	On clinical trial	
Mephentermine, and salts thereof		
Menrohamate		
*Methoxyphenamine hydrochloride with or without		
sodium citrate		
†Methylpentynol; methylpentynol carbamate	Oblivon C	British Schering
*Methyprylone		
Neostigmine salts and neostigmine alkyl salts		
3-(5-Nitro-2-furfurylidene-amino)-2-oxazolidone		
*Phensuximide		1
alpha-(4-Piperidyl)benzhydrol hydrochloride	Frenquel‡	Riker
*Pipradrol hydrochloride		1
§*Pyridostigmine salts	Ronicol Compositum	Roche
†Thenalidine, and salts thereof, whether or not		
combined with calcium salts	Sandosten ointment	Sandoz
†Vitamins, vitamin complexes and provitamins, whether or not combined with one or more of		
the following substances, that is to say, iodine, sodium chloride and salts of calcium, of cobalt, of potassium or of zinc		
†Any antimicrobial substance [as described in pre-		
vious orders] mixed with cetyl pyridinium		
11 -14		
*Buclizine		
Duchline	I .	

Extension of previous exemption.

Redefinition of previous entry, preparation already exempted. (Approved name.) Transferred from Head II.

Preparation available shortly.

COMPANY NEWS

Previous year's figures in parentheses

ALLEN & HANBURYS (SOUTH FRICA), LTD. — Mr. Harold Dreein has been appointed managing trector in succession to Mr. G. G. AcIntyre, who has had to resign beause of ill health.

L. ROSE & CO., LTD.—Net profit or 1956 is £109,345 (£111,212) and the ordinary dividend 22½ per cent. (same). rospects for the current year appear be favourable, says the chairman, 1r. L. Rose.

BRITISH ALKALOIDS, LTD.—inal dividend of 163 per cent., making 53 per cent, for year to March 31, 957 (same equivalent) is declared, abribing £20,930 net. Subject to final udit, profit, after all charges, is £21,320 [24,513). U.K. tax charged £36,600 [34,150].

CUSSONS, SONS & CO., LTD. — esults for 1957 to date show an impovement on those of the correspondg 1956 period, the chairman, Mrslie Cussons, has told shareholders. urnover for 1956 was slightly higher dexports were increased, but with the in costs, group profits, before tax, ll from £368,581 to £280,343. Net offt was £122,600 (£181,265) and the vidend is held at 20 per cent.

SCHWEPPES, LTD.—Final dividend is 12½ per cent. for 1956 on the Ordinary capital increased by a one-for-ten rights issue. The interim on the old capital was held at 5 per cent. Subject to final audit, group trading profits, after deducting special development charges in subsidiaries at home and overseas, are £1,737,632 (£1,840,063) and the group net profit is £498,458 (£663,115), after tax of £709,967 (£708,771). Profit attributable to the holding company is £464,673 (£595,108).

IMPERIAL CHEMICAL INDUSTRIES, LTD.—An unchanged 10 per cent, dividend on Ordinary capital is announced for 1956. The final dividend is again 6 per cent, but payable on £143 millions (£142 millions), Consolidated sales were £24 millions higher at £435 millions and established a new record. After heavier provisions for depreciation and employees' profit sharing bonus, group income contracted from £53:58 millions to £50:12 millions and the net profit from £29:68 millions to £26:36 millions. The parent's net income of £19:29 millions compares with £23:98 millions.

KODAK, LTD. — Mr. H. S. Carpenter (chairman and managing direc-

tor) was taken seriously ill during a recent visit to America. In view of the gravity of his present condition and on medical advice that it may be months before there is any possibility of improvement, the following changes and appointments have been made by the board:—Mr. D. McMaster has resigned as deputy chairman, but retains his seat on the board; Mr. A. D. Page has been appointed a deputy chairman and acting chairman; Mr. I. D. Wratten is appointed a deputy chairman; and Dr. D. A. Spencer is appointed managing director.

COOPER, McDOUGALL & ROB-ERTSON, LTD. — Net profit of the parent company for 1956 is £75,292 (£135,493) according to preliminary statement. Consolidated profit, before taxation, is £202,034 (£333,542); taxation £153,153 (£187,772). The consolidated profit of £202,034 includes dividends from Argentine subsidiaries of £11,300 (£9,500); being earned in a trading year ending subsequent to Junc 30, 1955, they are remittable under Argentine regulations. That profit also includes income from associated companies £76,756 (£76,617) and is stated after deducting depreciation of £124,363 (£111,173). Ordinary dividend recommended is 7½ per cent., (10 per cent.); carry forward, £73,848 (£69,695).

THE BRITISH DRUG HOUSES, LTD.—The preliminary statement of results for 1956 shows group profit after all charges except taxation amounted to £432,283 (£522,076). The taxation charge was £236,978 (£291,192) giving a group net profit of £195,305 (£230,884). The whole of these profits in both years is attributable to the members of the holding company. After retaining £40,981 (£21,025) in the accounts of subsidiary companies there remains the net profit of The British Drug Houses, Ltd., of £154,324 (£209,859) to which must be added the carry forward of profits from the previous year of £117,945 (£89,789) making a total of £272,269 (£299,648). Dividend on Ordinary stock recommended is 17½ per cent. (same).

F. W. BERK & CO., LTD.—The address by the chairman (Mr. A. D. Berk), circulated with the accounts for 1956 states that despite 15 per cent. increase in sales net profits were £115,147 compared with £174,567 in 1955. Highly competitive markets have precluded the recovery of most of the rising costs whilst during the year the company maintained a number of voluntary "standstills" in prices. The associated company, Abbey Chemicals, Ltd., remains in the development stage; it may be some time yet before a dividend can be expected from that source, the chairman states. The reduction in profit on manufacturing operations largely counts for the reduced earnings in 1956. The increased turnover on the mer-chanting side kept the level of profits comparable with those in 1955, despite the higher cost of salaries and amenities. For accounts see C. & D., April 20, p.

EVANS MEDICAL SUPPLIES. LTD. — The statement by the chairman (Mr. Ian Fergusson) accompanying the accounts for 1956 discloses that some increase in sales just failed to compensate for reduced margins and increased expenses, so that trading and manufacturing profit fell from £373,321 to £362,922, whilst the year's available balance was reduced by £5,173 to £98,091. The proposed transfer of £40,631 to reserve and the payment of a dividend at the same rate as a year ago, although now on the larger ordinary capital for the full year, will leave £89,179 to be carried forward compared with £86,655 brought in. Work of most of the buildings for the Burma Pharmaceutical Industry is complete and the latter is building up to full production. A new subsidiary company, Evans Medical (Nigeria), Ltd., was registered in Lagos during the year to develop our interests in this important market and all formation expenses and non-recurring initial costs of establishment have been written off in the consolidated accounts. Overseas markets now take one-half of the company's production.

Voluntary Liquidation

V. UNDERWOOD & CO., LTD., chemists. [R.O.]: 68 Park Road, London, N.W.1. Liquidator: Mr. R. P. Booth, 14 Holborn Viaduct, London, E.C.1

BUSINESS CHANGES

MR. RUSSELL M. LAKE, M.P.S., has acquired the pharmacy of the late Mr. H. Birkett, M.P.S., 26 Baker Street, Hucknall, Nottingham.

FROM May 1, Bradstreets British, Ltd., and the Dun & Bradstreet Organisation (credit reporters) are to assume the title Dun & Bradstreets, Ltd.

NU-SAN, LTD., have moved to 15 Wellington Circus, Nottingham (from 10 Drake Street, Red Lion Square, London, W.C.1). Orders should be sent to the distributors: Dalmas, Ltd., Weymouth Street Factory, Leicester.

RANK PRECISION INDUSTRIES, LTD. (cine and optical division) have opened a section for cine equipment repair in the service department, 52A Goldhawk Road, London, W.12 (telephone Shepherds Bush 8681). Orders and requests for spare parts should be sent to the company at Woodger Road, Shepherd's Bush, London, W.12.

ALBRIGHT & WILSON, LTD., removed to 1 Knightsbridge Green, London, S.W.1, from Park Lane, W.1, on May 3 (telephone: Kensington 3422). As part of an internal reorganisation within the group, the manufacturing activities in the past carried on by the company have been transferred to a wholly-owned subsidiary: Albright & Wilson (Mfg.), Ltd. There is no change in the addresses of the offices and works from which the manufacturing activities are carried on but all communications should now be addressed to Albright & Wilson (Mfg.), Ltd. The head office of that company is at Oldbury, near Birmingham, but the head sales office is at the same address as the London sales office of above.

Appointments

VINE'S BIOCRIN, LTD., 222 Harrow Road, London, W.2, have appoin-

ted Mr. A. E. Roberts to their representative staff.

EUCRYL, LTD., have appointed Anderson Jenkins & Co., Ltd., 64 Queen Street, Glasgow, their agents in Scotland for Eucryl and Galloway products

products. COW & GATE, LTD., Guildford, Surrey, have appointed Mr. R. Max-

Mr. R. Maxwell.

well their assistant sales and a d v e r t i s - ing manager.

PFIZER,
LTD., Folkestone, Kent,
have appointed
Mr. W. James
Eastwood sales
manager of
their newly
created proprietaries division.
In that capacity
Mr. Eastwood
will be respon-

sible for the distribution and marketing of the company's proprietary (noncthical) lines.

MARRIAGES

DRIVER — PRICE. — At Baildon parish church, Baildon, Yorks, on April 27, Thomas Driver, M.P.S., Rostle Top Road, Earby, Lancs, to Brenda Marilyn Price, St. Aidan's Road, Baildon.

LEE—ADAMS. — At Stoke Parish Church on April 4, Gordon H. Lee, M.P.S., 47 Siddeley Avenue, Coventry, to Sheila Adams, 50 Bawnmore Road, Bilton, Rugby.

DEATHS

ARNOLD. — At Little Croft, Purn Road, Bleadon Hill, Weston-super-Mare, Somerset, on April 19, Mr. Francis J. Arnold, M.C., aged sixty-onc. Mr. Arnold would have completed in August, twenty-five years' service as representative for Ex-Lax, Ltd. He was known to many chemists in the London area where he lived until 1941 and afterwards to those in the West Country, South Wales and Birmingham areas. He is survived by his widow and a son.

GAUTIER. — Recently, Dr. Raymond Gautier, former assistant director-general of the World Health Organisation.

POTTER.—Recently, Mr. William Potter, M.P.S., 22 Meteor Road, Westcliff-on-Sea, Essex, aged ninetyone.

Mr. Maurice Blumenthal writes: The death of William Potter breaks a link with the West Ham Pharmaceutical Association that lasted for over half a century. The deccased was a founder member and was its president in 1905, 1913 and 1926. He was jealous for the pharmacist's reputation and from the outset of the operation of the Insurance Act did his best to promote and maintain the highest possible standards for the profession. He had a strong personality. His integrity and sense of honour were of a high order and he showed little tolerance for those who stepped down from the heights he

set for himself. In his private life and in the pharmaceutical politics of the borough which he adorned he thought with kindness, he acted with courage and he differed with grace. He will be remembered by his friends with affection and respect.

SMITH.—On April 22, Mr. Charles Wigston Smith, M.P.S., 5 Oxford Street, Shepshed, Loughborough, Leies, aged fifty-three. Mr. Smith had been for many years in business as a chemist in the Bull Ring, Shepshed, Leies. His father founded the business there over forty years ago.

PERSONALITIES

MR. H. HOLLAND, M.P.S., proprietor of the Aldwick Road Pharmacy, 80 Ald-

macy, 80 Aldwick Road, Bognor Regis, Sussex, has been elected a member of the West Sussex Pharmaceutical Committee.

Mr. Alexander Forsyth, B.Sc., M.P.S., who was recently appointed managing director of T. & H. Smith, Ltd., Edinburgh (see C. & D., March 30, p. 346).

MR. PETER EDWARDS, who has been appointed merchandising manager

of Richard
Hudnut, Ltd.
and Lamberi
Chemical Co.
Ltd., was previously assistani
sales manager
of Richard
Hudnut, Ltd.
and before join
ing that com
pany in 1956
served with Col
gate Palmolive
Ltd.

MR. P. GLEESON, M.P.S. (export department, Ciba Laboratories, Ltd.), if at present on a two-week tour of Ireland giving lectures and film shows to pharmacists.

MR. H. B. KINLAY, M.P.S. (director of Heynes Mathew, Ltd., Cape town; and of South African Druggist Ltd., Johannesburg), has arrived is London. All communications may be addressed to him c/o Davis & Soper Ltd., 52 St. Mary Axe, London, E.C.3

MR. JOHN BAIKIE, M.P.S., Nun eaton, Warwicks, has been appointed chairman of Warwickshire Pharmaceutical Committee. Mr. Baikie is a pharmaceutical member of Warwickshire Executive Council, and is chairmated the Warwickshire Branch of the National Pharmaceutical Union.

MR. W. L. JEFFREY, M.P.S., ha taken up an appointment with Bur roughs Wellcome & Co. as an executive in their overseas division with duties in connection with the development of special markets. Mr. Jeffrerecently returned from Canada wher he held the position of general sale manager of Poulenc, Ltd.

LEGAL REPORT

Sales Without Supervision

AT Southend-on-Sea court on April 26 fine of £10 on each of seven sum-monses was imposed on Pavilion Pharnacy (Leigh-on-Sea), Ltd., 1075 London Road, Leigh, and an order was also made for payment of 28 8s. costs. At a hearing on April 5 which was adjourned so that the company could be given a chance to be epresented in court, it was alleged in even summonses that the firm sold by etail on various dates in November and December 1956, while not an authorised seller of poisons, a Part I poison; another summons alleged that sale of a poison on a date in Decemper 1956 was not effected by or under he supervision of a registered pharma-cist, and the seventh alleged that on he same date the firm unlawfully used, in connection with the sale of goods by retail, the title "chemist." For the Pharmaceutical Society it was tated that quite apart from the numper of summonses, the case was serious. A letter from the company, signed by Mr. G. A. Cawkwell—whose late ather it was understood, used to own he business and was a pharmacist— nad said that the company had been wound up; but a search had shown hat it was still in existence. In one of the cases a proprietary article con-aining strychnine had been sold, four of the summonses related to the dis-bensing of National Health Service orescriptions, which included Danger-ous Drugs. When the son took over bus Drugs. When the son took over the business he employed for a time a ady pharmacist. In September 1956 in inspector under the Pharmacy and Poisons Act, 1933, asked Mr. Cawkvell where she was and he replied that he was not there, that she had had a ad attack of internal trouble. nspector believed him at the time and varned him that he must not sell poisons while the pharmacist was not here. Later the inspector visited the hop again and asked for the pharmacist and was told that she had been desitted to be served. dmitted to hospital suffering from olitis. The inspector went to the hosolitis. The inspector went to the nos-ital. It was true enough that she was here, but she was not a patient, she as working there. The inspector subequently sent one of his staff into the nop and something containing strychine was supplied. The inspector himelf went in and made inquiries about If went in and made inquiries about rescriptions. Four prescriptions con-ining poisons which were dispensed to the company in the absence of a narmacist were shown in court. The implete picture was, the Society's diction said, "of a chemist's shop ing carried on by an unqualified pern, poisons being sold at the counter a normal way and the dispensing of escriptions, including some containg poisons." The Home Office had ft it to the Pharmaceutical Society to ke the present proceedings, and the ouncil had instructed him to submit the court that it was one of the prst cases that it had ever presented magistrates. At the resumed hearing a Society's solicitor told the clerk at nothing was known previously ainst the company or the directors. It had been that the transfer of the defence it was claimed that

the days when the chemist was in the dispensary at the back of the shop "mixing up poisons and other things" were largely gone. Today most of such things were manufactured by large wholesale chemists and druggists and wholesale chemists and druggists and were sent, already packed, to the retailer. That was mentioned lest the bench should have a picture of people at the back of the shop dispensing wholesale quantities of poisons. There were three directors of the company— Mr. and Mrs. G. A. Cawkwell and Mrs. Eileen A. Brown, who was a pharmacist. The company were not running a drug store which had sprung up overnight and from which was being sold goods to the public, including Dangerous Drugs, by someone who did not know anything about them.
Mr. Cawkwell's father owned the business in 1933 and was a pharmacist and Mr. Cawkwell worked with his father in the shop up to the 1939-45 war, when he went into the forces. Since his return there had always been a pharmacist on the premises shortly before the inspector called. The lady pharmacist left because there were insufficient prescriptions for her to do and a successor could not be found. The business was now operating merely as a drug store. Mr. Cawkwell had looked for a pharmacist up to just before December 1956. It was easy to say "well, he should have stopped this," but life was not like that, he had a business and he wanted to keep it

MANUFACTURERS' ACTIVITIES

Factory Extension. — The inauguration ceremony of a factory extension

The Lord Mayor of Portsmouth (Councillor A. C. Asquith-Leeson) cuts the first turf with a silver-bladed spade to mark the start of building operations on the new extension of the Paulsgrove plant, Cosham, of Johnson & Johnson (Gt. Britain), Ltd. Watching are Mr. J. F. Brooke (chairman) and Mr. J. Roberts (plant manager).

scheme at the Cosham, Portsmouth. premises of Johnson & Johnson (Gt. Britain), Ltd., was performed by councillor A. G. Asquith-Leeson (Lord Mayor of Portsmouth) on April 25. Before a gathering of civic officials, contractors, directors, customers, staff and workers of Messrs. Johnson & Johnson, the Lord Mayor cut the first sod to mark the commencement of work on the site. Mr. J. F. Brooke (chairman, Johnson & Johnson (Gt.

ADVERTISING AWARD: Layton trophy won by Mather & Crowther, Ltd., advertising agents, London, W.C.2, on behalf of Genatosan, Ltd., for an advertisement for Sanatogen. The advertisement was based on photographs from the Steichen exhibition of "The Family Man." The Layton awards are made annually by C. & E. Layton, Ltd., London (trade typesetters, process engravers, etc.) for the best black and white and colour letter letter-press advertisements published in Britain during the year. Seventy agencies submitted a total of 1.175 entries for consideration. The trophy illustrated and gold medal form the supreme black and white award.

Britain), Ltd.) said that the firm had first become associated with Portsmouth in 1950 and by 1951, thanks to the tremendous amount of help given by the local authorities the removal to Portsmouth had proved to be one of the quickest and smoothest that the firm had ever known. At first there had been 270 workers. Now with 370 employees there was overcrowding and the extension was really necessary. Production had, in fact, more than doubled since 1952. Johnson & Johnson, said the Lord Mayor, was a company with whom Portsmouth was glad to be associated. It was an example to any industrial concern to see how the factory was run and the ideal conditions under which the products were made. Many of the employees had come from the Midlands and he was glad that they had elected to stay. He congratulated Mr. J. Roberts (plant manager) on the fine job which he had done. The extension, which will cover an area of 60,000 sq. ft. and is scheduled to be completed within a year, will be used mainly for baby products manufacture. Among the guests were Mr. W. R. D. Voke (chairman, Portsmouth Branch of the Pharmaceutical Society), Mr. N. L. Banks (secretary, Portsmouth Branch of the Society) and Mr. J. C. Bloomfield (secretary, Portsmouth Branch, National Pharmaceutical Union).

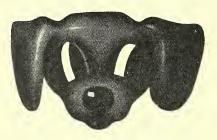

Twentieth-century Treatment.—Two expeditions setting out this year have included supplies of Terramycin, donated by Pfizer, Ltd., Folkestone, Kent, in their medicine chests. They are the Mayflower II, on its way to the United States and the Queen's University, Belfast, expedition to central West Spitsbergen, due to leave in the summer.

TRADE NOTES

Advertising Error Corrected.—International Laboratories, Ltd., 205 Hook Road, Surbiton, Surrey, point out that the retail price of twenty-five Do-Do tablets is 3s. 8½d, and not as stated in their advertisement in the C. & D., April 20.

"Sanpanties." — Southalls (Birmingham), Ltd., Charford Mills, Saltley, Birmingham, market three types of "sanpanties," a nylon brief lined with fine rubber (blue carton); a rayon tricot sanpantie with soft plastic protec-tion and elasticated legs (maroon carton); and a rayon tricot sanpantie with open leg (green pack).

"Give a Dog a Good Name."national competition is announced by Petfoods, Ltd., Melton Mowbray, Leics, in connection with a sales pro-motion scheme for Meet. Competitors are being asked to name the dog whose head (seen here) appears on the label and send it in together with one Meet label (large or small). The person who,

in the opinion of the judges, suggests a name which most aptly fits the dog receives furniture to fill a house or £1,250 in cash. There will be twenty second prizes consisting of Hoover washing machines and fifty third prizes of £5 each. Retailers from whom the Meet was purchased by prize-winners each receive £5. Entry forms are being distributed to retailers by the comdistributed to retailers by the company's representatives. Customers can enter for the competition on those forms or through a coupon which is appearing in national Press advertising commencing June 21. Judges include a representative for Petfoods, Ltd., an advertising executive and Mr. Peter Haigh, the well-known television personality. Press and television advertising will be "exceptionally" heavy.

In London Area Only. toilet tissue is being offered by Bowater-Scott Corporation. Ltd., St. Andrew's Road, London, E.17, in choice of four colours only in the London postal area at present (see C. & D., April 27, p. 459).

NEW PRODUCTS AND PACKS

Easy-to-swallow Penicillin V.—Abbott Laboratories, Ltd., 3 Wadsworth Road, Perivale, Greenford, Middlesex, announce the introduction of a new 250 mgm. Composillin-V Filmtab (potassium penicillin V, Abbott), the advantages claimed (v, Filmtab (potassium penicillin V, Abbott), the advantages claimed for Abbott), the advantages claimed for which are that it is easy to swallow and fast to disintegrate. Potassium penicillin V is relatively stable in acid media and not inactivated by gastric secretions. Its ingestion is understood to be followed by rapid absorption from the alkaline medium of the duality of from the alkaline medium of the duo-denum. Compocillin-V is the com-pany's trade mark for its brands of penicillin products, and the new form is in addition to Composillin-V oral suspension, which supplies 300,000 units of penicillin V as hydrabamine units of penicillin V as hydrabamine salt. When compared on a unit-forunit basis, both products produce higher blood levels than the equivalent salts of penicillin G. The 250 mgm. Compocillin-V Filmtabs (400,000 units) are supplied in bottle of twenty-five.

New Colours in Cosmetics. — Elizabeth Arden, 25 Old Bond Street, London, W.1, are now marketing a new pale, "pure pink" lipstick and "golden poppy" lipstick, rouge and nail lacquer.

Calamine Cream. — The Crown Capsule Co., Ltd., Campbell Street, Helensburgh, Dumbartons, are introducing Skin Soft, a soothing and emoliant and complete the comp lient calamine cream for the treatment of irritant skin conditions, sunburn, rough hands, etc. The product is attractively packed in outers of 2 doz. tubes.

Baby Pants. - Southalls (Birmingham), Ltd., Charford Mills, Saltley, Birmingham, have designed new baby pants from soft plastic material. The pants are waterproof and durable, especially if washed frequently. They are available in medium and large sizes with either elastic or open legs and presented in an attractive blue pack.

Lanolin-impregnated Baby Pants. — P. B. Cow & Co., Ltd., 12 Hay Hill,

Berkeley Square, London, W.1, have re modelled the range of Li-Lo plasti baby pants by the introduction of lanolin-impregnated plastic sheeting. The pants are now all-welded, n stitching at all being used in the manufacture. They are made in the manufacture. They are made in the following models: Medium and larg sizes in open and elastic leg styles an sizes in open and elastic leg styles an Li-Lo Snappifit in large open-leg style only. At the same time Messrs. Con have restyled the pack, which now in cludes an attractive counter-displa box to hold 1 doz. of a size, each part of pants being individually packed in a printed transparent cellulose envelope.

Hairbrush Free. — With the ne hair spray Set-a-Net manufactured b Delavelle, Ltd., Orsman Road, London N.1, a free hairbrush is being offered The spray is packed in a non-spl polythene, squeeze bottle, and, wit the handbag-size brush, is comfortabl carried in a beach bag or beauty bo. To make the spray as light as possible and so avoid giving the hair a stif set look, it has been made withous shellac. Lanolin has been added "t encourage natural sheen." Set-a-No has a light, flowery perfume. Delavelle, Ltd., Orsman Road, Londor

PHOTO FAIR 1957

OURING the six days of the second British Photo Fair held at Olympia, ondon, recently, nearly 104,000 people passed through the turnstiles— 104,000 uch is the measure of public interest

n photographic equipment.

So comprehensive was the array of apparatus which ranged from simple

apparatus which ranged from simple snapshot cameras costing under £5 sach to precision-made expensive miniatures and elaborate professional apparatus, that this review must concentrate mainly on new equipment of interest to the average chemist-dealer. A gratifying feature was the emergence of two British cameras of original design—the Agimatic (shown in prototype at the Photokina, 1956, exhibition at Cologne, Germany (see C. & D., November 3, 1956, p. 486)) and the Periflex III. The AGIMATIC produced by AGILUX, Ltd., Purley Way, Croydon, Surrey, is a 35-mm. instrument described as "the fastest handling 35" by reason of its four-in-one control. A by reason of its four-in-one control. A single trigger concentric with the shutter housing first releases the shut-ter, then, as it is further depressed, advances the film, records the shutter and sets the film counter. Other fea-tures are a coupled combined range-finder/view-finder. nine-speed fully finder/view-finder, nine-speed fully synchronised shutter, interchangeability of lenses (45-mm. f/2·8 and 85-mm. f/5·5 telephoto) and built-in extinction-

f/5·5 telephoto) and built-in extinction-type exposure meter. Deliveries com-mence in May. Price: £24 17s. 6d.

The PERIFLEX III (K. G. CORFIELD, LTD., Merridale Street, Wolverhamp-on), is a development of the current model, with styling improved by en-closing the periscope focusing device ander the top plate, which now carries only the winding and rewind knobs and accessory shoe. Focusing is at eye level nd the shutter has been speeded /1000 to 1 sec.; and is now reset as he film is advanced. The periscope ocusing device is on the lens axis, its inely etched screen permitting focus-ng at the operating aperture. A bright lirect-vision finder with interchangeble front elements suits various lenses. rices: with Lumar-X f/3·5, £65 2s. 6d.; with f/2·8 Lumax, £79 6s.; with f/1·9 umax, £89 10s.

ther British Cameras

There were several new models in he camera range of Ross Ensign, TD., 3 Clapham Common North Side, ondon, S.W.4. A simplified and re-yled version of the well-known Ful-

ss-Ensign Fulvueflex twin-lens camera and nchroflex capacitor.

Vue—the FULVUEFLEX—has a fixedfocus lens, large reflex view-finder with hinged hood and ever-set flash-contachinged hood and ever-set flash-contacted shutter. It takes twelve exposures on 120-size roll film and at its price (£2 14s. 11d.) is likely to prove popular. A full range of accessories includes capacitor flash unit (£1 12s. 6d.), ever-ready case (15s. 4d.), lens hood (2s. 5d.), yellow filter (6s. 11d.), portrait lens (8s. 4d.) and folding direct-vision view-finder (14s. 7d.). The SELFIX SPECIAL 820 and the AUTORANGE 820 both take eight or twelve RANGE 820 both take eight or twelve

Ross-Ensign Autorange 820 with Ross Xpres f/3.8 lens in Prontor SVS light-value shutter.

exposures on 120 or 620 film. The Selfix has a built-in but uncoupled range-finder/view-finder, while the Autorange has the range-finder coupled to the focusing system. Both are fitted with Ross Xpres f/3 8 lenses in Prontor SVS shutter with light-value settings. Prices: Selfix Special, £35 19s. 4d.; Autorange, £59 17s. Shown in prototype was an Engine colour camera with type was an Ensign colour camera with exposure calculator embodied in the shutter and diaphragm controls, and a colour-coded depth-of-field scale. The camera is equally suitable for monochrome work. It is expected to be available towards the end of the year.

An Inexpensive Model

CORONET, LTD., 308 Summer Lane, Birmingham, 19, were showing their new VISCOUNT, an 84s. camera

Coronet Viscount camera.

taking eight exposures on 828 film. It has a cemented achromatic lens working at f/8 and f/16 in a two-speed shutter (1/100, 1/30 and B) and is flashcontacted. Available accessories are an ever-ready case, flash-gun, filter, close-up lens, and lens hood.

Imported Cameras

Introduced since the 1956 Photokina is the LEICA IIIg, (E. Leitz (Instru-Ments), Ltd., 20 Mortimer Street, London, W.1), which drew serious photographers as a honeypot draws bees. Similar in general design to model IIIf, which it supersedes, the instrument has an efficient bright-line view-finder system (rather like that on the M3) and simplified flash synchronisation. Like many other pieces of Continental equipment, the new camera is available only in limited quantities while present quota restrictions continue.

Newcomers in the ZEISS range (distributors in Britain: PEELING & KOMLOSY, 181 Victoria Street, Dunstable, LOSY, 181 Victoria Street, Dunstable, Beds), were the Super Ikonta IV, the IKOFLEX Favorit, the CONTINA III and the CONTAFLEX IV. All are on quota. Super IKONTA IV is a folding 6 x 6-cm. camera with builtin exposure meter, f/3·5 Tessar in Synchro-Compur-MXV shutter with exposure values. Price: £74 15s. 4d. IKOFLEX FAVORIT is a 6 x 6-cm. twin-lens reflex also with built-in photoelectric exposure meter and photoelectric exposure meter and f/3·5 Tessar in Synchro-Compur shutter. Price: £117 12s. 7d. CONTINA III is a 35-mm, miniature with built-in photo-electric meter and 45-mm, Pantar photo-electric meter and 45-mm. Pantar f/2·8 lens in Prontor-SVS shutter with light-value settings. Price: £53 8s. 8d. CONTAFLEX IV is a direct-vision 35-mm. reflex with built-in p-e meter and 5-cm. Tessar f/2·8 in Synchro-Compur with exposure values. Price: £100 18s. 2d. £109 18s. 2d.

A Prototype on Show

R. F. HUNTER, LTD., 51 Gray's Inn Road, London, W.C.I, showed a prototype of a 4 x 4-cm. ROLLEIFLEX produced largely from tools used to make the pre-war model but incorporating features that have been progres-In its dove-grey livery, the little twinlens reflex looked very smart: it is not yet in production. Also on Messrs. Hunter's stand were the latest Rollei-flexes (the 2.8E and 3.5E), which have built-in exposure meters and five-glass objectives—Planars and Xenotars—lenses of extremely fine resolving

New models in the Franka range were also shown by Messrs. Hunter.

Baldessa I camera shown by J. J. Silber.

They were the Solidas and the Frankarette and the Frankarette Super. The SOLIDA II and IIR are 6 x 6-cm. folding models with f/3.5 Xenar lenses in Prontor-SVS shutters with light-value scales. IIR has also a built-in uncoupled range-finder, Prices: £25 10s.

and £30 12s. 6d. respectively.
The FRANKARETTES are 35-mm. instruments exhibiting ingenious points of design. The Frankarette has an f/2 8 Ennit lens in Prontor-SVS shutter with light-value scale, while the SUPER model has an f/2 8 Xenar, also

in Prontor-SVS with light-value scale, plus a coupled range-finder. Prices: £25 19s. 6d. and £37 6s. respectively.

On the stand of J. J. SILBER, 51 Avenue Chambers, Vernon Place, London, W.C.I, perhaps the star new camera was the BALDESSA I, a pleasant-looking 35-mm. instrument with ant-looking 35-mm. instrument with rapid-wind hinged key in the bottom plate permitting rapid sequence shooting in conjunction with the "pianoing in conjunction with the "piano-key" shutter release. The lens is a 45-mm. f/2 8 four-glass Westanar in 9speed Prontor-SVS shutter with exposure values. Price: £23 19s. 6d. Other newcomers on the Silber stand were the WELTAFLEX 6 x 6-cm, twin-lens

Weltaflex camera on stand of J. J. Silber.

reflex with 75-mm. f/3.5 Meritar lens in 8-speed Vebur shutter. Price: £34 11s. 6d.; the HALINA, another twin-lens focusing reflex with f/3·5 lens in 4-speed shutter. Price: £12 12s.

Also on view, but not available in this country yet, were samples of the PRAKTICA and PRAKTINA 35-mm. eye-level reflex camera and of the 6 x 6-cm. PRAKTISIX single-lens reflex. All emanate from the Eastern Zone of Germany.

Newcomers were also to be found on the stand of Amplion (1932), LTD., 175 Cricklewood Lane, London, N.W.2. A 6 x 6-cm. twin-lens reflex, the MONTIFLEX, with f/3.5 Pluscanar lens in 9-speed shutter, was available in three versions (with 9-speed Prontor-SVS with click stops, at £30 7s. 8d.; with magnifier, £30 18s. 1d.; with latest light-value shutter, £32 15s.). The prices include an ever-ready case in hide. In the 35-mm, range were the DeJur, Montana and Tina. The DEJUR has an interchangeable f/2·8

Westar lens in click-stop Prontor-S, lever-wind, shutter. Price: £23 1s. 2d. The MONTANA has an f/3.5 Delta-The MONTANA has an 1/3.5 Deltamon in 3-speed shutter. Price £10 10s. The TINA is a ladies' version presented in two-tone colour scheme (snakeskin and black, blue and white, black and white, red and gold, green and gold). Price: £11 0s. 7d.

New PAXETTE models on the stand of Neville Brown & Co., Ltd., 77 Newman Street, London, W.1, were the Newman Street, London, W.1, were the 1A and the Supers. Model 1A is fitted with a 50-mm. f/2·8 four-element Plastigon lens in Prontor-SVS light-value shutter. Price: £24 18s. 6d. Super Paxettes have coupled range-finder/view-finder. Model 1/P has a non-interchangeable f/2·8 Pointikar lens in Prontor-SVS shutter. Price: £32 12s. 6d.; model 2/P has an interchangeable f/2·8 Pointikar in Prontor-SVS. Price: £38 18s. 6d.; 2/X has an f/2.8 Xenar, but is otherwise similar to the 2/P Price: £48 18s. 6d. 2/T is

the 2/P Price: £48 18s. 6d. 2/T is fitted with an f/2·8 Tessar. Price: £65.

ACTINA, LTD., 10 Dane Street, London, W.C.1, were showing their ranges of Bilora and Regula cameras, includor Bijora and Regula cameras, including the comparatively recently introduced BELLA 66, a simple two-speed twelve-on-120 camera with f/11 lens. Price: £5 19s. 11d.; the BOY, a smart box-form camera, also making twelve exposures on 120 film, and with f/11 lens. Price: £2 19s. 9d.

REGULA IIIa is a 25 mm instru

REGULA IIIa is a 35-mm. instrument with lever-film transport coupled with shutter-wind and f/2.8 Rodenstock lens in light-value shutter. Price: £23 19s. 7d.; model IIIb is similar but incorporates a Gossen exposure meter. Price: £32 19s. 11d.

A new model of the Lordomat, the C35, made its appearance on the stand of Photo Science, Ltd., 10 North End Parade, London, W.14. It is a de luxe 35-mm. instrument incorporating rangefinder and photo-electric exposure

Arriving from Italy after the Fair opened, the CLOSTER SPORT a wellmade if simple 35-mm. camera, was shown by Industrial Photo Equip-MENT, LTD. (a new company formed by H. K. Paul), 60 Berners Street, London, W.1. It has lever wind, time and instantaneous shutter, and focusing f/8 achromat lens.

Displayed—But Not Available

Two models in the range of cameras shown by AGFA, LTD., 27 Regent Street, London, S.W.I, the Automatic 66 and the AMBI-SILETTE, introduced at the 1956 Photokina, made their first and tantalising appearance in this country, for at present they are beyond the reach of the British market on account of import restrictions. The AUTO-MATIC 66 is a 2\frac{1}{4}-in.-sq. folding model with a built-in photo-electric exposure meter that automatically sets the shutter speed appropriate to the stop selected by the user. The AMBI-SILETTE is a 35-mm. instrument bearing a strong family likeness to its less affluent relatives familiar to British dealers and public. Other Silettes on show were the Super, with its coupled rangefinder, the Silette L, which has a built-in exposure meter with light-value scale, and other models with the new Compur-Rapid ten-speed shutter with

Agfa Rondix 35 daylight developing tank. Havin no film-loading spiral the tank has a smal developing space and is therefore economica in developer.

light-value scale, and new Prontor-SVS

nine-speed shutter.

Messrs. Agfa staged, in fact, theibiggest-ever showing at the Photo Fair with three stands. ISOLETTE (2½ : 2½ in. sq. picture) cameras shown in cluded the Super with coupled range finder and Solinar f3·5, 75-mm. with four-element lens. The Rondix 35 day light developing tank is without film light developing tank is without film spiral; in consequence it takes les developer. The Agfa KM capacitor type pocket flashgun is designed to take capless flash bulbs exclusively and i described as the smallest ever. Lucimeter is a new version of Agfa' photo-electric meter. A "surprise" fea ture of the company's exhibit was a Agfacolor transparency measuring ove 100 sq. ft.! Photographic material shown included Agfacolor negatives reversal and cine films, a range o tone-true black-and-white films, photographic papers and darkroom equir ment.

NORTH STAFFS PHOTOGRAPHIC SEP VICES, Balls Yard, Newcastle-under Lyme, Staffs, were showing a ner range of NORDINA 2\frac{1}{4}-in. sq. camera

Nordina 24-in. sq. camera.

of non bellows type with collapsib lens mount, body release, shutter/file lens mount, body release, shutter/fill wind interlock, and die-cast bod Model III.P has f/2·9 Steiner 1 Pronto. Price: £15; III.SVS has f/2· Steiner in light-value Prontor SV Price: £18 9s.; Nordina Super has specifications as for III. SVS but will uncoupled range-finder. Price: £21 5s. 4

(To be concluded)

Inability to take aspirin . . .

It was recently reported (Brit. Med. J., 1: 444, 1957) that of 178 rheumatic patients, 25% could not take plain aspirin in adequate dosage.

Of this 25%, however, the great majority tolerated a modified aspirin such as Paynocil.

Not only are Paynocil tablets usually well tolerated by the stomach (even on the heavy dosage needed for rheumatoid arthritis), but they are extremely palatable, disintegrate instantly on the tongue without water, and cause no discomfort or unpleasant after-sensation.

. . indicates

non-irritant, palatable, quick-dispersing aspirin

Detailed recommendations for dosage in rheumatoid arthritis will be gladly supplied on request

603 Ph./65(68)/1

BENCARD LTD. PARK ROYAL, LONDON,

Hundreds of thousands who were travel sick last year on land, sea and in the air, need never suffer that discomfort again

because this year you will be able to give them their

'SEA-LEGS'

12.5 mg. tablets meclozine dihydrochloride

for the prevention of travel sickness by land-sea-air

Here is the travel sickness remedy you can confidently recommend to *any* of your customers! Meclozine represents a real dvance in the prevention of travel sickness on land, sea or in the air.

4 more-than-seasonal line

In thousands of homes travel sickness is a rear-round problem—the majority of sufferers are among children travelling daily to school, and adults journeying to and from their work. In millions more homes there is a vast demand or an effective remedy during the holiday nonths. SEA-LEGS will bring relief to countless ufferers throughout the country!

24-hour protection

SEA-LEGS will not cause dry mouth, blurred vision, or other unpleasant side-effects. They are completely safe for children of all ages (one tablet is the dose for children 1 to 12 years)—and one dose will give protection for 24 hours. Each attractive plastic dispenser case contains 16 tablets—eye-catching display outers and matching showcards are available. SEA-LEGS may be sold by pharmacists without restriction.

Exempt from Purchase Tax

HE BRITISH DRUG HOUSES LIMITED LONDON N.1

Today, the preference is for oral rather than parenteral treatment—provided it is as effective. Penicillin-V has precisely this advantage, giving clinical results consistently comparable with injectable penicillin. It achieves this end because, unlike penicillin-G, it is remarkably stable in gastric secretion. Penicillin-V gives higher blood levels than other oral penicillins and is more potent, dose for dose. When penicillin is indicated, let Penicillin-V Lilly be the choice.

Average Dose:

125mg, (200,000 units) four times daily, in-

creased in severe infections.

'Pulvules'

125mg, and 250mg.

Suspension

Paediatric 62.5mg. per 5cc.

Tablets and Suspension Penicillin-V-Lilly.

Peter Pays Paul

THE new Purchase Tax Order mentioned on page 482 prings into force a new list of tax-free "essential" drugs and medicines from the beginning of the week. In the list are forty-eight new entries although about one-third are redefinitions of entries formerly appearing under the chemical name and now entered under the designation approved by the British Pharmacopæia commission.

Of the remaining entries thirteen have previously ppeared under head two and are now moved to head hree thus permitting their admixture with other inredients in that section without attracting tax. Eleven ther entries are extensions of previous entries as for xample l-thyroxine sodium (thyroxine was already exmpt). Another illustration of the anomalies which contantly arise in the working of purchase tax is seen in ortisone and analogous steroid hormones which have een exempt tax whereas if the cortisone was mixed ith buffers such as aluminium hydroxide or magesium trisilicate those preparations were taxed. That regularity and others are now put right so that Peter otherwise the National Health Service) does not have pay Paul (the Treasury) purchase tax on some irty items which it has had to pay over the past nine onths. Losing (as usual) by the changes is the retail harmacist who now has stocks of preparations on hand nd will not be able to obtain any rebate on the tax he

In the past we have mentioned, and we again reitere, that Purchase Tax Orders should be made at more equent intervals so that the period of paying tax assential drugs that are eventually being freed, is to a minimum. There seems no reason why such inouncements should not be made with the regularity at Key Industry Duty notices are made. Nine months' terval (the last order appeared in June 1956) is uncessarily long.

A Second Refresher

TH the addition of a new chapter on ion exchange, d a section on milliequivalents, and after a thorough erhaul of the remainder, the C. & D. Refresher urse for Pharmacists has been reissued. First printed a series of articles in The Chemist and Druggist, Course met a wide demand from pharmacists whose idemic studies were undertaken way back in years fore 1951-52. It dealt with the many changes and vances that have taken place in recent years—methods preparing sterile materials; new types of ointment

bases, and emulsifying agents; the antibiotics; the antihistamines; and so on. Its great value for those who are inclined to feel a little modest about their claims to be considered knowledgeable on those and similar modern developments is that it is simply written and presented and does not presuppose an acquaintance with pharmaceutical knowledge more recent than, say, ten or fifteen years back. In its new enlarged form, with blue linsen instead of the previous paper cover, this 82-page booklet is extremely good value at its price of 7s. 6d. (postage threepence). It deserves the attention alike of those older pharmacists who are keen to bring themselves up to date and of those younger ones who may be no less anxious to ensure that the knowledge they have acquired does not slip away from them in the rough-and-tumble of earning a living.

Overseas Trade in March

EXPORTS of drugs, medicines and medicinal preparations from the United Kingdom during March at nearly £3.6 millions set a new record for any month and brought the total value for the first quarter of the year to £9.8 millions against £9.1 millions in the same quarter of both 1955 and 1956. The March total was particularly noteworthy in that it was obtained despite lower exports to the two chief markets, Australia and

India. For the first time in any month proprietary medicines shipped overseas were valued at over £1 million while the antibiotics, excluding penicillin, were valued at over £1½ million. Export and import values of those items for which statistics are available are given in the accompanying table. Among items moving at a higher rate than of late were ointments and liniments, sulphonamides and barbiturates.

Imports of prepared medicines were considerably lower in March totalling just over £600,000 against over £900,000 in recent months. Whilst the shortage of ipecacuanha root is frequently mentioned in our Trade

Report section it is interesting to note that the value imported during March was £31,660 against £2,469 in March 1956. Menthol also showed a considerable rise at £29,753 against £5,582 imported during March 1956.

United Kingdom total exports maintained the recovery shown in February, reaching a new high level of £297 millions. Imports also rose in March to £362 millions, their highest level since March 1955 apart from the exceptional month of January this year. Reexports rose to £16½ millions and thus the visible trade deficit for the month was £48½ millions which was close on the monthly average for the year 1956.

Onward from Galen

FACE creams are functional in character and are advertised to the public in an ethical manner. That is the conclusion drawn by Dr. J. Ebling in the New Scientist dated April 25, in which he poses the question "are skin creams of any use?" The physiology of skin is discussed and the need to replace natural secretions of the sebaceous glands traced to the civilised habit of constant washing. As most creams are emulsions containing water they add moisture as well and what better substance could be used, he asks, than lanolin, the natural sebum of sheep and a constituent of many preparations. Hormone creams he puts in a different category with the hypothesis that oestrogens prevent changes associated with the ageing of skin by promoting the utilisation of sugars and hence rate of proliferation of epidermal cells. Increased rate of keritinisation and water retention thus promote a firm skin texture. Of the creams containing vitamins, amino-acids, sugars and their derivatives he is less enthusiastic. "I think one should remain sceptical of those so-called nutrient creams," he writes. "No satisfactory evidence has been published that they are beneficial in practice."

HAVE you an accident book? That was the question put to twelve employers recently at a London conference. Seven said, simply, No; four had never heard of such a thing; and one said he had a book but was not sure where he could lay his hands on it. Yet an accident book is legally required and must be kept readily accessible on (a) all premises coming under any of the provisions of the Factories Act and (b) any premises where ten or more persons are normally employed at the same time. Its function is to help injured employees to give formal notice of their accident. That is important if a claim is made at the time or later for industrial injury benefit. The cut finger of today may become the septic hand of tomorrow. If an accident book is not available to record the details at the time of the accident a later claim may be delayed or impossible. The book must be kept "readily accessible" and that is taken to mean readily accessible to anyone who wants to write in it, not locked up in a safe. A book properly used can help an employer to trace the cause of frequent absences from work, damaged fingers and other mishaps that reduce the efficiency of his staff. If a certain employee is constantly hurting himself in a certain way then there are many reasons why an investigation should be made. If the employer is unable to reconcile the notice with the facts as found by him he must record the circumstances so found. The idea is to ensure that the facts are confirmed by a responsible person while they are still fresh in the minds of witnesses. Any inquiries arising from a claim for benefit can then be answered readily. The employee must, of course, make the claim. But the employer has the duty of providing any information called for by the insurance office about the accident and the nature and circumstances of employment

of anyone stated to be suffering from an industrial disease.

The accident book (Form B.1.510) is obtainable from H.M Stationery Office or through local booksellers.

Why should the shopkeeper, already paying high rates, be forced to pay to have his rubbish removed? Generally speaking, all rubbish from business premises is classed a trade refuse. That includes waste of all kinds, including building materials. In the case of a house and shop com bined, separate bins are normally used or the council, b agreement, assesses the trade refuse as so much a week and charges accordingly. It is noteworthy that in consider ing whether rubbish must be classed as "house refuse or "trade refuse" regard must be paid to its physica character and nature and not to "the process of circum stances by which it is accumulated." The law says tha councils must make a reasonable charge and most author ties normally charge what they think it costs them to co lect the refuse. That varies from district to district, but i rarely less than tenpence a bin. Should traders be required to pay for this service? There is no "official view on this point for the local authority associations ar reluctant to comment on matters of this type unless the themselves are making proposals for a change in law. Then is a feeling, however, that the present-day system charging traders for services of this type should be scrapped. Many treasurers and public cleansing officia regard the procedure as out-of-date and there are othe who would support a plan to bring the system to an end.

FOR FLASH OR FOR BANG?

"I want a film with twelve explosions."

MEDICAL ABSTRACTS

MPHETAMINE POISONING

Phree examples of acute amphetamine poisoning are reported by Greenwood and Peachey (British Medical Joural, 1957. 1. 742). Two patients took the drug orally and one y inhalation. One patient became poisoned by chewing ne contents of one-and-a-half amphetamine inhalers. One ase developed an acute psychosis, a common feature, note the authors, of severe amphetamine intoxication, which requires heavy barbiturate sedation both for prophylaxis and on treatment. All three patients showed an increased tolernote to hypnotic drugs. The first patient slept for only eight ours after injections of gr. 3 (0.2 gm.) of sodium phenoarbitone, 20 mils of paraldehyde, and gr. ½ (0.01 gm.) of norphine within five-and-a-half hours. The second and third atients were wide awake after receiving a total of gr. 12 0.78 gm.) of sodium phenobarbitone by injection during the previous twelve hours.

NTISEPTIC TREATMENT FOR BURNS

The use of an antiseptic method for the local treatment of urns and scalds has given excellent results over a period f fourteen months in the the "burns unit" of the Royal Iospital for Sick Children, Glasgow (Lancet, 1957. 1. 862). Grant and Findlay state that though antiseptic methods ave been criticised on the grounds that antiseptics, like

infection, can destroy the surviving epithelium or inhibit its growth they are satisfied that chlorhexidine deals effectively with bacteria without damage to the surviving epithelium or appreciable delay in healing. A 0.5 per cent. aqueous solution of chlorhexidine, made by dilution of 2 per cent. Hibitane concentrate (Imperial Chemical Industrics, Ltd., pharmaceuticals division) was used in the treatment of 108 patients, only two of whom developed clinical evidence of infection. Of ninety-two patients treated by a variety of methods in the previous twelve months, ten had become infected. On admission to the burns unit, the walls, floors and furniture of which are damp dusted twice daily with 1:20 carbolic acid solution, the area of the burn is cleansed with 1 per cent. cetrimide, rinsed with normal saline and covered with gauze soaked in 0.5 per cent. chlorhexidine solution. When dressing the burns the nurse wears rubber gloves and before attending to the next patient she washes the gloved hands with soap and water, rinses in 1 per cent. Dettol solution, in sterile water, dries and finally applies 1 per cent. chlorhexidine cream to the gloved hands. The gauze dressings are resoaked with chlorhexidine solution twice daily and twice a week are removed to allow inspection of the lesion and removal of separating sloughs. The areas are not left exposed until epithelial cover is complete.

Critic Challenged

SIR,—May I ask Critic (C. & D., April 20, p. 436) what he really means by purely "phoney" research in the seld of medicine, and to convince your eaders that such really does exist by producing just a few good examples of what he has in mind which, to use his word, would account for an expenditure of many millions of pounds, sollars and marks?

London, S.E.5 I. GELLMAN

Recommended to Electors

SIR,—May we recommend to all memers of the Society the name of Mr. Villiam Cooper for re-election to the ouncil? As a result of many years' xperience in practically every branch the profession, Mr. Cooper is well quipped and has the undoubted ability a serve us well. We in the Bristol and istrict Branch have every confidence at, if re-elected, Mr. Cooper's wide xperience in retail, the Forces, teaching and the manufacturing fields will ove of great value to the Council. Kenneth J. Adams, Chairman

KENNETH J. ADAMS, Chairman E. J. LLOYD, Secretary

SIR,—The committee and members of e Southampton and District Branch of e Pharmaceutical Society wish to ask the support of all pharmacists for e candidature of Mr. J. M. Dowty for election to the Council of the Society. T. Dowty has devoted his energies er nearly fifty years to the service of armacy and the betterment of the armacist's conditions of employment d service. He has been a member of d has held office in many committees th within and outside the National alth Service. He is chairman of the uthampton Executive Council and

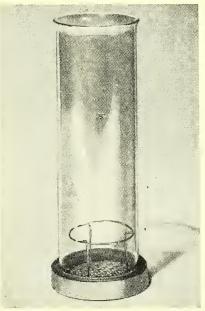

he has been a member of the Society's Council for six years. For the past three years his chairmanship of the Law Committee has reflected the confidence the Council have in him, and we do earnestly ask for every member's support for him in this election.

FRED MURLEY, Secretary

Southampton

SIR,—On behalf of the members of Exeter and District Branch of the Pharmaceutical Society we express their support of the candidature of Mr. H.

PROBLEM PICTURE

What is it, and what is it for? Answer next week.

Jarvis Graves for membership of the Society's Council. Mr. Graves is a proprietor pharmacist. In public and pharmaceutical affairs his experience in local government affairs at district and county level would give him a knowledgeable conviction of where the pharmacist fits in the "welfare state." In addition, his good work as secretary of the Pharmaceutical Committee for Devon and Exeter, he has kept in close touch with the everyday problems of the retail pharmacist in the National Health Service. His presence on the Council would ensure a very adequate representation of the views of the retail pharmacist in this latter connection. We would especially ask the west country pharmacists to make a concerted effort to give Mr. Graves their exclusive support, particularly the many who have had his help and advice in the past, If elected we feel that his exceptional abilities would be a great asset to the deliberations of the Council and the Society.

H. W. H. PAYNE, Chairman J. H. WARD, Secretary Exeter

SIR.—The members of the Torquay and District Branch of the Pharmaceutical Society wish to associate themselves with the Exeter Branch in recommending to all members the candidature of Mr. Jarvis Graves in the Council election. We of the southwest are fully aware of the administrative ability and sterling qualities of Mr. Graves who has always been the champion of the practising pharmacist in this area. His experience of pharmaceutical affairs is considerable and we confidently recommend his election.

A. Baker, Chairman S. Wigglesworth, Secretary Paignton

PHARMACEUTICAL SOCIETY OF NORTHERN IRELAND

Monthly meeting of Council

THE president (Mr. C. A. Quinn) was in the chair at the monthly meeting of the Council of the Pharmaceutical Society of Northern Ireland held in Belfast on April 18. Also present were Messrs. Walter C. Tate (vicepresident) and G. E. McIlhagger (treasurer), Dr. R. G. R. Bacon, and Messrs. A. Templeton, R. M. Watson, W. S. Hall, C. E. Moss, H. F. Moore, S. E. Campbell, J. Kerr, W. P. Ewart, W. H. Boyd, J. Caldwell, R. Gibson, H. W. Gamble, and W. Gorman (secretary). Apologies for absence were received from Professor E. B. C. Mayrs and Messrs. F. R. Moore, J. McGregor, W. J. Thornton and H. G. Campbell.

New Member Welcomed

The minutes of the March meeting were adopted on the motion of Mr. Ewart, seconded by Mr. Caldwell. The President, in his opening remarks, welcomed Mr. Watson on attending his first meeting and congratulated him on his co-option to the Council as the registered druggists' representative in succession to the late Mr. James Irwin. Mr. Watson replied and expressed his thanks to the president and Council for their welcome. Mrs. Irwin wrote thanking the Council for its sympathy on the death of her husband.

The Ministry of Home Affairs informed the Council that the following persons were authorised to sign supply orders for Dangerous Drugs for use by midwives: Belfast: Drs. H. A. Warnock and K. M. Cathcart; Misses M. F. J. Baird and E. F. Magill; Londonderry Borough: Drs. W. R. Abernethy and R. M. Burns; Antrim County: Drs. W. Bamber, E. E. Perry, A. J. Watt, E. C. Torrie, W. Castles, J. H. MacLoughlin, W. M. Burns, E. I. Mulholland, J. G. McKenny, A. I. McKenna, G. Hill and G. G. Seymour, Misses G. Massey and E. Johnston; Armagh County: Drs. J. B. McKinney, J. Taylor, R. L. Roxburgh, J. Scott, S. Hayes, J. Mark, E. P. McGrath, B. L. MacQuillan, C. Moss, G. T. N. Lawson, E. Hawkins, G. McClafferty and M. Millar; Fermanagh County: Drs. B. O. Moore, A. W. Dickson and W. J. Patterson; Londonderry County: Drs. J. H. Kitson, J. H. Brewster, W. R. Johnston and G. P. Marshall, Miss A. Bruce; Tyrone County: Drs. R. F. McKeown and J. C. Watson.

MR. GAMBLE said that the list put an onus on pharmacists to know whether the person signing an Order had the power to issue it. He asked if it was the case that every time he received an official order he was to consult the list to ascertain if the person had authority to sign it. He thought the onus should be placed on the authority to ensure that the person who signed it had the necessary authority. Mr. Campbell thought that the Council should ask the Ministry to clarify the whole matter. Mr. Gamble said that one of the persons named on the list might leave his post tomorrow and if his successor signed an order and it was supplied by the chemist, the chemist might find that he had broken a law. The Council agreed to the suggestion to seek clarification of the points from the Ministry.

In a letter to the Council, a firm of manufacturers stated that it had been in communication with the Ulster Chemists' Association and had informed the Association that supplies of veterinary Terramycin were now available from wholesalers in Northern Ireland. Mr. Gorman reported that as instructed at the previous meeting of the Council he had been in touch with Cambrian Airways on the possibility of chartering an aircraft for members returning from the Bristol Conference. The company had stated that because of schedule service commitments they were unable to assist the Society. The Council agreed to drop the

suggestion of returning by air. The Ministry of Hom Affairs, in a letter to the Council, approved of the Boar of Examiners appointed by the Council for the 1957 examinations.

An application was received from Mr. Bernard Branni gan, Cavendish Square, Belfast, for the restoration of hi name to the Register. The application was approved.

Presenting the report of a meeting of the Law Committee held on April 11, Mr. McIlhagger (chairman) stated that the work of drafting new by-laws was continued and the remainder of the Society's general regulations considered Certain by-laws dealing with matters not covered by the regulations were framed and it was hoped shortly to submit to the Council for their consideration, copies of the draft by-laws *in toto*. The report was adopted on the motion of Mr. McIlhagger, seconded by Mr. Campbell

Non-observance of Professional Conduct

Mr. Moss, submitting the report of the Ethical Commit tee of April 15, said that the non-observance of the State ment Upon Matters of Professional Conduct by member of the Society was discussed and it was agreed to recom mend that the secretary should be instructed to write t each member pointing out that a copy of the Statemen had been sent out to members more than a year ago; that complaints of its non-observance had been received an that in future action would be taken against a member of body corporate who failed to observe the standard of cor duct laid down; a copy of the Statement to be sent to eac member with the letter, the latter to draw the particular attention of members to Clauses 3, 7, 8 and 9 of the State ment, which dealt with such matters as "prescription accurately dispensed," etc. Mr. CAMPBELL said there wer probably many chemists who had a large stock of labe incorporating the term "accurately dispensed." Mr. Mos said it had been suggested that where labels had alread been printed such matters could be cut off. The repo was adopted on the motion of Mr. Moss, seconded by Mr. Gamble.

The report of the Finance Committee was adopted of the motion of Mr. Caldwell, seconded by Mr. Temple Ton. On the motion of Mr. Campbell, seconded by Mr. F. Moore, it was agreed to affix the seal of the Socie to the certificate of qualification of Miss Anne F. Troy.

The secretary reported that it had been announced the *Belfast Gazette* that the Minister of Home Affairs hamade regulations empowering members of the Royal Ulst Constabulary who were in charge of police stations at any other person in the Force approved by the Inspect General to be in possession of morphine in ampoule for administration in cases of emergency.

MR. KERR suggested that the Education Committee shou consider the question of post-graduate courses. He fe that something should be done along those lines in t near future as they were going to introduce pharmacolo; to the syllabus. He felt that such a course would be great benefit to many of the older pharmacists. He thoug that the courses could be arranged in the evening with t co-operation of the College of Technology, Mr. HA (chairman of the Committee) said that Mr. Kerr had me tioned the suggestion to him earlier and he agreed to ta the matter up and raise it at the next meeting of the Col mittee. Mr. Gamble suggested that before the Committ discussed the matter an approach might be made to t General Health Services Board who might be willing co-operate in the organisation of the classes and he thous that that might be achieved through the Local Pharmace tical Committee. Mr. Gamble's suggestion was agreed

FIGURES IN THE PHARMACEUTICAL WORLD

INCE facilities for pharmaceutical education were first organised in orthern Ireland every student has revived his training—or some of it—at the hands of Mr. C. W. Young, F.P.S., he period that is involved is twenty-the type that the separation of the six counties from the rest of Ireland and during that time 1,179 have ined their qualification in Belfast. The sort of start in life they have do, and the standards of professional officiency they have acquired, are of der than local significance. For inforthern Ireland there has never been ough pharmaceutical employment for those who qualify. A percentage, thaps as high as 20 per cent., are effect trained for export—to the hodesias (where there is a "colony" twenty Northern Ireland pharmaceutic, and to Britain under reciproty. To gain an impression of the lality of the trainees one might do orise than mingle with one of the reties which Mr. Young brings over London at each Easter vacation, hey are a growing band. This year ere were twenty-three, and it was say to see that they were on terms of fection and admiration for their determined the subjection and admiration for their determined has a subject to the subject to th

ader.
Mr. Young has indeed the facility invaluable in a teacher—of arousing his students an enthusiasm for pharacy, its ideals and its possibilities that prerequisite to a sense of profesonal responsibility throughout life, e has, too, outside interests in music, and the drama which can hardly fail, they enter into it, to widen the students cultural background. A bachelor, is other special enthusiasm—psychic search—is more personal: he is the nairman of the Belfast Psychical Soety.

From the start his intentions were ways to make his career in the ademic field. What he would have ked was to qualify in medicine, but ants were fewer in those days and the ances were not forthcoming. Almost rtuitously he entered pharmacy, plying for a vacancy that was adverged. Accepted, he had a four-year prenticeship at the pharmacy of A. J. ark, Church Hill, Edinburgh, a high-class suburban "business with enty of dispensing. He stayed on for o years as unqualified assistant, using a evenings for pharmaceutical study, fore going at twenty-one as a student the Heriot-Watt College.

After qualifying he went straight o teaching, but in England, lecturing Plymouth in pharmacy, pharmaceual chemistry and pharmacognosy. Was two years at Plymouth when opportunity opened for him at Belt that was to become his life's work. Belfast the teaching of pharmacy the diploma comes within the emistry and pharmacy department of Belfast College of Technology, an itution conducted by the City Coration. A degree (B.Sc. in pharmaceu) is awarded by the Queen's Univer-

49. Mr. C. W. YOUNG

sity of Belfast, but even for that the pharmaceutical studies are taken extra-murally at the College, at which Mr. Young is senior lecturer. Coming into the College to fill a new appointment, Mr. Young was able to plan his own curriculum, within the limits, of course, of the requirements of the Pharmaceutical Society of Northern Ireland. Between the College and the Society there is no formal link, but, by good fortune, the ideas of Mr. Young have accorded well with the policies of the Council, In Northern Ireland the tendency has been to hold on to a pre-graduate apprenticeship of two years, in which arrangement Mr. Young would, given a free hand, require the apprentice to engage in some form of part-time studies. The current syllabus, adopted two years ago, provides for a full-time course for Part I and a two-year full-time course for Part II. The pharmacists Northern Ireland produces are therefore of that practical, versatile kind one has come to associate with the best Scottish tradi-

tion, able to tackle new problems with the confidence that comes from acquiring manipulative skills side by side with theoretical principles.

While Northern Ireland no doubt regrets losing a fifth of her pharmacists to emigration, it seems likely that, as degree students increase and diploma places lessen in the schools of pharmacy in Great Britain, they may be sure of even eager acceptance by proprietors here who seek pharmacists with an acquaintance with, and liking for, shop life. So long as they base their ideals on those of their mentor, Mr. Young, the traditions of pharmacy in the United Kingdom will be in good hands. As a teacher Mr. Young aims to promote in his students the "development of self" and would consider his work to have failed if they acquired knowledge without arriving at a fuller personality and character in the process. Those who have met some of the "products" of his endeavours would say he was highly successful.

GUIDE TO NEW MEDICAMENTS

Information about proprietary products supplied principally on prescription. Reprints on perforated gummed paper for affixing to index cards are obtainable from the Editor.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (May 4, 1957)

MATROMYCIN*

Manufacturer: Pfizer, Ltd., 137 Sandgate Road, Folkestone, Kent,

DESCRIPTION: Capsules, each containing 250 mgm, of oleandomycin as the crystalline phosphate.

INDICATIONS: Principally infections caused by staphylococci, streptococci, pneumococci and *Hæmophilus influenzae*.

DOSAGE: Should be adjusted according to the type and severity of the infection. The recommended average daily dose for adults is 1-2 gm. and for children approximately 15 mgm. per lb. body weight. Total daily dosage for both children and adults should be divided into four equal doses and given at intervals of six hours. Matromycin should be administered with cold milk or a light meal.

How Supplied: In bottles of twelve and 100.

FIRST ISSUED: February 11, 1957.

Notes: Matromycin possesses striking freedom from cross resistance with most other antibiotics in current clinical use. The development of resistance to Matromycin is a slow process, which is slowed still more by combination with penicillin or the tetracyclines. When combined with those antibiotics, there is a marked synergism of antimicrobial effects.

*Cross reference for card index:

OLEANDOMYCIN: See Matromycin and Romicil.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (May 4, 1957)

DELTALGYCORTRIL*

Manufacturer: Pfizer, Ltd., 137 Sandgate Road, Folkestone, Kent.

DESCRIPTION: Tablets, each containing 0.5 mgm. prednisolone and 330 mgm. (gr. 5) aspirin.

INDICATIONS: Acute, subacute or chronic rheumatic conditions where glucocorticoids or salicylates have proved effective in larger doses. Those include mild rheumatoid arthritis, osteoarthritis, acute self-limiting attacks of early gout, and connective tissue inflammation involving the muscles, nerves and joints,

CONTRA-INDICATIONS: Patients with peptic ulcer.

DOSAGE: SUGGESTED: Initially, 6-8 tablets daily. That dosage should be increased until a symptomatic response is noted and then gradually decreased until a maintenance level of 1 tablet three or four times daily is reached.

How Supplied: In bottle of 100. First Issued: February 1, 1957.

Notes: Care should be taken when the drug is used in patients with severe hypertension, diabetes, renal insufficiency or cardiac decompensation. In the presence of infection, adequate anti-infective measures must also be instituted.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (May 4, 1957)

FEMERITAL

Manufacturer: M.C.P. Pure Drugs, Ltd., 86 Strand, London, W.C.2.

Description: Tablets, each containing dibutamide (α-dibutylamino-α-(p methoxyphenyl)-acetamide), 100 mgm.; salicylamide, 125 mgm.; phenacetin, 125 mgm.; caffeine, 25 mgm.

INDICATIONS: Treatment of primary dysmenorrhæa.

DOSAGE: 2 tablets twice or three times daily. Therapy should be started two days before the pain is expected or as soon as it appears whichever is practicable, and continued until the day after the pain would normally have ceased.

How Supplied: In packs of thirty (five units of six) and 504 (eighty-four units of six) tablets.

FIRST ISSUED: February 1, 1957.

TYZANOL paediatric nasal drops

Manufacturer: Pfizer, Ltd., 137 Sandgate Road, Folkestone Kent,

Description: Each mil of buffered saline contains 0.5 mgm of tetrahydrozoline hydrochloride with thiomersalate as preservative.

INDICATIONS: As a topical application for nasal decongestion i infants under two years old and young children between th ages of two and six.

DOSAGE: Infants up to two years, 1 drop in each nostril no more often than once every four to six hours; children two to six years, 1-2 drops in each nostril up to three times a day

How Supplied: In 15-mil bottle with a calibrated dropper. First Issued: February 4, 1957.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (May 4, 195

CO-HYDELTRA*

Manufacturer: Merck Sharp & Dohme, Ltd., Hoddesdon, Hert Description: Prednisolone, buffered to counteract the hype acidity that may be expected in patients receiving intensis adrenocortical steroid therapy. Each multiple compressed tablet contains in a central core, prednisolone 5 mgm.; are in an outer layer, magnesium trisilicate, 50 mgm., and drival aluminium hydroxide gel, 0.3 gm.

INDICATIONS: All conditions for which prednisolone is indicate Dosage: Initial: 4-6 tablets daily in divided doses; Mai

TENANCE: 1-4 tablets daily in divided doses. How Supplied: In bottles of thirty, 100 and 500.

FIRST ISSUED: February 1957.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (May 4, 1

SYNTOCINON

MANUFACTURER: Sandoz Products, Ltd., 134 Wigmore Str London, W.1.

DESCRIPTION: Synthetic oxytocic principle of the pituitary 1 terior lobe. Brand of injection oxytocin, B.P.

INDICATIONS: Post maturity hypotensive uterine inertia.

Dosage: As for injection of oxytocin, B.P.

How Supplied: In boxes of six, fifty and 100 0.5-mil ampo containing 5 units; and in boxes of six and thirty 2 ampoules containing 2 units. First Issued: February 1

THE CHEMIST AND DRUGGIST Guide to New Medicaments (May 4, 1957)

COACTYL*

ANUFACTURER: Ward, Cassenne, Ltd., 116 Victoria Street. London, S.W.1.

DESCRIPTION: A buffered complex of prednisone and aspirin. Each tablet contains: Aspirin, 300 mgm.; prednisone, 0.5 mgm.; aluminium hydroxide, 160 mgm.; and magnesium trisilicate, 30 mgm.

NDICATIONS: Rheumatoid Conditions: Fibrositis, synovitis, tendinitis, myositis, bursitis, lumbago, juxta-articular rheumatism, osteo-arthritis, rheumatoid arthritis, Non-rheumatic diseases: Mild bronchial asthma, respiratory allergies, nasal allergies, digestive allergies, drug hypersensitivities, mild cutaneous allergies. As a maintenance therapy in severe cases of rheumatism or allergy, after stabilisation by corticoids in normal therapeutic doses.

Dosage: Normal: 1-2 tablets four times daily. Maximum: 3 tablets four times daily.

How SUPPLIED: In bottle of fifty.

First Issued: February 1957.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (May 4, 1957)

HYDRODELTALONE tablets

Manufacturer: Ward, Cassenne, Ltd., 116 Victoria Street, London, S.W.1.

DESCRIPTION: Tablets, each containing 1 mgm. or 5 mgm. prednisolone.

NDICATIONS: As for cortisone and hydrocortisone.

Dosage: Initial: 2-4 5-mgm, tablets twice daily for two to seven days; subsequently the dosage should be reduced by 2.5 mgm, every two or three days until a suitable maintenance dosage (e.g., 2.5-10 mgm, twice daily) is achieved. A further reduction in the dosage should be made as the case permits. The correct dose for any individual should be determined by close clinical study by the doctor.

Iow Supplied: In bottle of thirty. Issued: February 1957.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (May 4, 1957)

DELTALONE

MANUFACTURER: Ward, Cassenne, Ltd., 116 Victoria Street, London, S.W.1.

DESCRIPTION: Prednisone, buffered. Each tablet contains prednisone, 5 mgm. or 1 mgm.; aluminium hydroxide, 250 mgm. and magnesium trisilicate, 50 mgm.

NOTICATIONS: All conditions for which prednisone is indicated.

OSAGE: INITIAL: 10–20 mgm. Deltalone twice daily for two to seven days; subsequently the dosage should be reduced by 2–5 mgm. every two or three days until a suitable maintenance dosage (e.g., 2·5–10 mgm. twice daily) is achieved. A further reduction in the dosage should be made as the case permits.

OW SUPPLIED: In bottle of thirty. PRST ISSUED: February 4, 1957.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (May 4, 1957)

HYDRODELTALONE intrasynovial injection

ANUFACTURER: Ward, Cassenne, Ltd., 116 Victoria Street, London, S.W.1.

SCRIPTION: A saline suspension containing 25 mgm. of prednisolone acetate per mil.

DICATIONS: Acute non-infective inflammations of the joints; hydrarthroses; chronic polyarthritis; joint stiffness; periarticular disorders: Scapulo-humeral periarthritis, bursitis, tendinitis. tenosynovitis.

SAGE: Knees, hips, shoulders: 1–2 mils per injection. Elbows, wrists: 0.5–1 mil per injection. Finger joints: 0.2 mil per injection. Frequency of injections depends on results obtained.

w Supplied: In vial of 5 mils.

ST ISSUED: February 1957.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (May 4, 1957)

HYDELTRACIN topical lotion

MANUFACTURER: Merck Sharp & Dohme, Ltd., Hoddesdon, Herts.

DESCRIPTION: A lotion containing prednisolone 0.5 per cent.;
neomycin sulphate, 0.5 per cent., aqueous vehicle, 15 mils.

INDICATIONS: Allergic or inflammatory disease of the skin, especially if complicated by infection.

USE: To be applied twice or thrice daily.

How SUPPLIED: In 15-mil plastic squeeze-bottle.

First Issued: January 1, 1957.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (May 4, 1957)

HYDRODELTALONE eye ointment

Manufacturer: Ward, Cassenne, Ltd., 116 Victoria Street, London, S.W.1.

DESCRIPTION: An eye ointment, containing 2.5 mgm, of prednisolone acetate per gm.

INDICATIONS: Acute and subacute conjunctivitis, blepharitis, eczema of the eyelids, keratitis.

Use: Apply a thin layer to the margin of the eyelids once or twice a day, and at night before going to bed.

How Supplied: In tube of 3 gm. First Issued: February 1957.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (May 4, 1957)

HYDRODELTALONE skin ointment

Manufacturer: Ward, Cassenne, Ltd., 116 Victoria Street, London, S.W.1.

DESCRIPTION: An ointment, containing 0.5 per cent. prednisolone and 0.5 per cent. neomycin sulphate.

INDICATIONS: Allergic dermatoses, contact dermatoses (from domestic or industrial causes, etc.), atopic dermatoses (allergic eczema), seborrhœic dermatitis, anal and vulvar pruritus.

Use: Apply a small quantity of cream to the affected parts one to three times a day. As soon as improvement is observed reduce to one application per day.

How Supplied: In tubes of 5 or 15 gm.

FIRST ISSUED: February 1957.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (May 4, 1957)

HYDRODELTALONE eye drops

Manufacturer: Ward, Cassenne, Ltd., 116 Victoria Street, London, S.W.1.

DESCRIPTION: Eye drops, containing 2.5 mgm. per mil of prednisolone acetate suspended in saline solution.

INDICATIONS: Acute and subacute conjunctivitis, blepharitis, eczema of the eyelids, keratitis.

Use: 1-2 drops of the solution should be placed in the conjunctival sac every hour or two in acute cases, every four hours or more in subacute cases or once improvement has begun. The duration of treatment varies from a few days to several weeks.

How Supplied: In 3-mil dropper bottle.

FIRST ISSUED: February 1957.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (May 4, 1957)

TERPACOL

Manufacturer: Brook, Parker & Co., Ltd., P.O. Box. No. 353, Ashfield, Horton Road, Bradford, 7.

DESCRIPTION: A cough elixir containing gr. 2/5 codeine phosphate and gr. 1/5 terpin hydrate in each two teaspoonfuls. Also contains eucalyptol and menthol.

Indications: Dry, persistent cough.

DOSAGE: Adults, ½-2 teaspoonfuls; children, ½-1 teaspoonful as directed.

How Supplied: In 16-fl. oz. and 80-fl. Jz. bottles.

FIRST ISSUED: January 1957.

NEW DANGEROUS DRUGS SCHEDULE

THE following is the new Third Schedule to the Dangerous Drugs Regulations 1953 (see p. 477).

THIRD SCHEDULE

DRUGS TO WHICH PART II OF THE DANGEROUS DRUGS REGULATIONS, 1953, APPLIES AND CLASSES
OF ORUGS FOR THE PURPOSES OF THE REGISTER
REQUIRED TO BE KEPT UNDER REGULATION 17.

1. Subject as provided in paragraph 2 of this Schedule, the drugs to which Part II of the Regulations applies are as follows:-

(1) Medicinal opium:

(2) Any extract or tincture of cannabis (Indian hemp) and any preparation, not being a preparation capable of external use only, made from extract or tincture of cannabis;

(3) Morphine and its salts, and any solution or dilution of morphine or its salts in an inert substance whether liquid or solid containing any proportion of morphine, and any preparation, admixture, extract or other substance (not being such a solution or dilution as aforesaid) containing not less than onefifth of one per cent. of morphine (calculated in respect of anhydrous morphine);

(4) Cocaine (including synthetic cocaine) and eegonine and their respective salts, and any solution or dilution of cocaine or its salts in an inert substance, whether liquid or solid, containing any proportion of cocaine, and any preparation, admixture, extract or other substance (not being such a solution or dilution as aforesaid) containing not less than one-tenth of one per cent, of cocaine or any proportion of ecgonine;

(5) Acetyldihydrocodeine;

- (6) Acetyldihydrocodeinone;
- (7) Alphameprodine:
- (8) Alphaprodine;
- (9) Benzylmorphine;
- (10) Betameprodine:
- (11) Betaprodine;
- (12) Diaeetylmorphine (also known as diamorphine or heroin);
- (13) Diethylthiambutene:
- (14) Dihydrodesoxymorphine (also known as desomorphine);
- (15) Dihydromorphine;(16) 1:3 Dimcthyl 4 phenyl 4 propionyloxyhexamethyleneimine;
- (17) Dimethylthiambutene (3 dimethylamino-
- 1:1-di-(2-thienyl)-1-butene); (18) Dioxaphetyl butyrate (4-morpholino-2:2diphenyl ethyl butyrate);
- (19) Dipipanone (6 piperidino-4: 4-di-phenyl heptan-3-one): (20) Ethylmethylthiambutene (3-ethyl methyl
- amino-1;1-di-(2-thienyl)-1-butene);
- (21) Hydrocodone (also known as dihydro-codeinone or Dicodid);
- (22) Hydromorphone (also known as dihydromorphinone or Dilaudid);
- (23) Hydroxypethidine;(24) Isomethadone (also known as isoamidone);
- (25) Ketobemidone:
- (26) Levomethorphan (formerly 3 methoxy-Nmethyl morphinan):
- (27) Levorphanol (formerly methorphinan);
- (28) Methadol;
- (29) Methadone (also known as amidone);
- (30) Methadyl acetate:
- (31) Methyldesomorphine (6-methyl-△6-desoxymorphine);
- (32) 1 Methyl 4 phenylpiperidine 4 carboxylie acid isopropyl ester;
- (33) Metopon (also known as methyldihydro-
- morphinone);
 (34) Morphine-N-oxide (also known as genomorphine);
- (35) Normethadone;
- (36) Oxycodone (also known as dihydrohydroxycodeinone or Eucodal):
- (37) Pethidine;
- (38) Phenadoxone;
- (39) Phenomorphan (3-hydroxy-N-phenethylmorphinan):
- (40) Propoxyphene (4 dimethylamino 1:2 diphenyl-3-methyl-2-propionyloxybutane);
- (41) Racemethorphan (formerly 3 methoxy-Nmethyl morphinan);
- (42) Racemorphan (formerly methorphinan);
- (43) Thebaine:

- (44) The esters of morphine (other than diacetylmorphine), ecgonine, hydrocodone, hydromorphone, acetyldihydrocodeinone and dihydromorphine; the ethers of morphine (other than benzylmorphine, codeine, ethylmorphine and pholeodine); the morphine-N-oxide derivatives, and any other pentavalent nitrogen morphine derivatives.
- 2.—(1) In this Schedule—
 (a) "ecgonine" means laevo-ecgonine and includes any derivatives of ecgonine from which it may be recovered industrially;
- (b) each drug specified in a sub-paragraph of paragraph 1 of this Schedule which follows sub-paragraph (4) shall be deemed to comprise its salts and any preparation, admixture, extract or other substance containing it or its salts.
- (2) This Schedule shall not apply to any drug when that drug is contained in-
- (i) the preparations, admixtures, extracts or other substances specified in the Second Schedule to the Regulations, or
- (ii) the preparations specified in the Schedule to the Order in Council dated April 13, 1937, and by virtue of subsection (2) of section twenty-five of the Act, having effect under subsection (4) of section ten thereof, excluding certain preparations containing morphine, cocaine, etc., from the provisions of Part III of the Act.

NOTES ON **NEW MEDICAMENTS**

Comments on items given in Guide to New Medicaments (p. 494), especially to show their relationship—pharmacological or chemical—with other products or compounds,

CO-DELTRA AND CO-HYDELTRA.-One of the side effects of steroid therapy is an increase in gastrie secretion and a rise in its pepsin content. That steroid-induced hyperacidity may be undesirable, but can be offset by suitable antacids. The above products, containing prednisone and prednisolone respectively with magnesium trisilicate and aluminium hydroxide, provide steroid and antacid therapy one tablet. Deltalone is a similar product eontaining prednisone.

FEMERITAL.—Contains dibutamide [cdibutylamino-

(p-methoxyphenyl) acetamide]. intensity of action of that antispasmodic is comparable with that of papaverine, but the effect is much more selective, being confined chiefly to the uterine muscle. Side effects assoeiated with general relaxation of smooth muscle brought about by most papaverine-like antispasmodies are consequently reduced. Other constituents of Femerital have analgesic properties, and eaffeine is included to overcome any central depression. Other products used in dysmenorrhoea (excluding hormones) include Buscopan (hyoscine-N-butyl bromide), Bardase, dieyclomine (Merbentyl, Wyovin), and Edrisal, Profenil and Spaseol.

MATROMYCIN. - An antibiotic derived from Streptomyces antibioticus; it is also known as oleandomycin. It is active against a wide range of Gram-positive organisms, but its main féature freedom from cross-resistance with most other antibioties in common use, although some cross-resistance with erythromycin has been reported. Development of drug resistance to oleandomycin in any case is slow, and may be delayed still further by combined treatment with penicillin or the tetracyclines. Romicil is another brand of oleandomycin, Sigmamycin is a combination of oxytetracycline with oleandomycin.

DELTAGYCORTRIL, - Contains prednisolone with acetylsalicylic acid. Prednisone is derived from hydrocortisone, and differs from that drug only in having a double bond in the steroid nucleus. That change in structure results in an increased potency and a reduction in side effects, (Prednisone is a similar com-pound derived from cortisone.) The combination with acetylsalicylie acid may permit maintenance treatment with small doses in those conditions that have responded to high doses

of either constituent. Cordex is a similar pr duct. Co-Actyl contains prednisone wi acctylsalicylic acid together with antacids, C Hydeltra contains prednisoline with antacid Co-Deltra and Deltalone are similar to C Hydeltra, but contain prednisone instead prednisolone.

COVATIN.—In the C. & D., March 2, p. 24 under the heading Notensil, this drug was i cluded with other phenothiazine derivative Although Covatin contains sulphur, being thioether, it has no ehemical relationship wi thiodiphenylamine (phenothiazine), or oth tranquillising drugs.

COMING EVENTS

Items for inclusion under this heading should sent in time to reach the Editor not later th first post on Wednesday of the week of insertion

Monday, May 6

LONDON SECTION, SOCIETY OF CHEMICAL INC. TRY, 14 Belgrave Square, London, S.W.1, 6 p.m. Annual meeting.

WEST KENT BRANCH, PHARMACEUTICAL SOCIET Beckenham library, at 8 p.m. Annual meetin Mr. T. Horne on "Radioisotopes in Me cine."

Tuesday, May 7

BOURNEMOUTH BRANCH, PHARMACEUTICAL SOCIE Grand hotel, at 7.30 p.m. Annual meeting NORTH LONDON PHARMACEUTICAL ASSOCIATION a NORTH METROPOLITAN BRANCH, Beale's resta ant, Holloway Road, London, N.7, at 7 p.m. Annual meeting.

Wednesday, May 8

EAST KENT BRANCH, PHARMACEUTICAL SOCIE Falstaff hotel, Canterbury, at 8 p.m. Ann meeting.

FOOO GROUP, SOCIETY OF CHEMICAL INDUST 14 Belgrave Square, London, S.W.1, at 6 p.m. Annual meeting. Dr. A. J. Amos "Food, Food Science, and the Food Groul A Twenty-five Year Review."

SWANSEA BRANCH, PHARMACEUTICAL SOCIETY, C tral library, at 7.45 p.m. Annual meeting.

WATFORD AND ST. ALBANS BRANCH, PHARMAC TICAL SOCIETY, Kodak, Ltd., Wealdstone, H row, Middlesex, at 2.30 p.m. Works visit

Thursday, May 9

BIRMINGHAM BRANCH, NATIONAL PHARMACEUTI Union, Chamber of Commerce, New Str Birmingham, 2, at 7.45 p.m. Annual meetir

FEDERATION OF SOUTH-EASTERN PHARMACIS Southover Grange, Lewes, at 8 p.m. Mr. D. Hudson (vice-president of the Pharmaceut Society) on "Marketing Policy."

HARROGATE BRANCH, PHARMACEUTICAL Blue Bird eafé, Parliament Street, at 7.30 r Annual meeting.

Manchester and Salford Branch, Natio Pharmaceutical Union, Engineers' club, Al Square, Manchester, at 7.45 p.m. Annual m ing.

MICROBIOLOGY GROUP, SOCIETY OF CHEMICAL DUSTRY. Two-day visit to antibioties and mentation division, research department, B Pure Drug Co., Ltd., Nottingham.

Friday, May 10

CHESTERFIELO BRANCH, PHARMACEUTICAL SOCI board room, Royal Hospital, at 8 p.m. An

Fine Chemicals Group, Society of Chem Inoustry. Conversazione at Fisons, I

MIOLANDS SECTION and MICROCHEMISTRY GR SOCIETY FOR ANALYTICAL CHEMISTRY, theatre, University, Edmund Street, Birn ham, 3, at 7 p.m. Discussion on "M determination of Functional Groups."

formula for quicker recovery

When the body is subjected to serious stress, doctors prescribe Stresscaps stress formula vitamins Lederle to compensate for sudden depletion of essential nutrients — in particular, ascorbic acid and the B—complex vitamins. Stresscaps hasten recovery by providing nutritional supplementation in the following conditions: after surgery, gastro-intestinal diseases, severe infection, shock, fractures, injuries, burns etc. Stresscaps promote wound healing and stimulate antibody production. They are dry-filled sealed capsules for more rapid and complete absorption with no unpleasant after-taste.

Each capsule contains:

Thiamine mononitrate 10 mg.

Riboflavine 10 mg.

Niacinamide 100 mg.

Ascorbic acid 300 mg.

5 mg.

Pottles of 30 capsules 4

Folic acid

TRADE REPORT

ne prices given are those obtained by importers or manufacturers for bulk quantities or original packages. Various arges have to be added whereby values are in many instances augmented before wholesale dealers receive the goods into ock. Crude drugs and essential oils vary greatly in quality and higher prices are charged for selected qualities.

LONDON, MAY 1: The general tone of the markets was again quiet with w major price movements in CRUDE DRUGS or ESSENTIAL OILS. Inquiry r PHARMACEUTICAL CHEMICALS returned to normal after the holidays ther more slowly than in previous years. The effect of wage awards rently made to some workers in the industry are expected to be reflected ortly in higher prices of several items.

The various grades of LIQUID PARAF-N, B.P., are dearer by 25s. per ton d the technical WHITE OILS by about ANEURINE HYDROCHLORIDE was reced on May 1 by 35s. a kilo. Simulneously RIBOFLAVINE and PYRIDOXINE DOROCHLORIDE became considerably wer. Vanillin from all sources pears to be in good demand.

Among BOTANICALS a quotation was ceived from origin for new crop

SCARA SAGRADA which indicated ice about 30s. a cwt. under the prest price for 1956 processed peel. time Cape ALOES eased by 3s. per t. for shipment and spot holders ere willing to accept 5s. less than eviously. African GINGER after fallg to around 400s. per cwt., c.i.f., r the No. 3 considerably improved d May-June shipment was later quo-l at 485s., c.i.f. White Sarawak PPER was one penny per lb. firmer the spot but TURMERIC was easier all positions. With little or no trade MENTHOL, prices were nominally unanged.

Among Essential Oils the spot lue of Chinese Anise was down by reepence per lb. and Cassia by sixnce; both were available on the spot the same level as the c.i.f. quota-ons. LEMON ranged between 24s. and s. per lb. against 26s. and 37s. pre-pusly. LEMONGRASS was twopence per easier on the spot. Elsewhere prices re unchanged in the absence of juiry.

Pharmaceutical Chemicals

AMINOSALICYLIC ACID. — The SODIUM t is 26s. 6d. per kilo for 50-100-kilo

Aneurine Hydrochloride. — Lower, ce per kilo is £17 7s. 6d. with 10-kilo at £17 2s. 6d. per kilo.

ASCORBIC ACID. — Rates per kilo: 1 b, £4 18s.; 10 kilos, £4 16s. SODIUM CORBATE is offered at the same prices.

Look at this dressing!

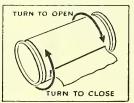

... It is STERAID GAUZE being drawn out of its patent container ready to be snipped off. What a convenience this could be to your Doctor and other customers: they would readily buy their Dressings in this simple and effective device . . . so very much superior to the ordinary packets.

STERAID DRESSINGS are made up in Gauze and Lint (Plain and Boric) in Display outers, each of twelve containers.

Enter a trial order through your Wholesaler. Your customers will appreciate the utility of this excellent product.

After use, one slight turn at the base will return the dressing to the container, enclosing it completely from any contamination, ready for further use . . .

Decilderm

OINTMENT · POWDER (DUNCAN)

In fungus infections of the skin such as tinea pedis (athlete's foot), tinea cruris (dhobi itch), moniliasis, etc., certain higher fatty acids are becoming an accepted treatment. Undecylenic acid with its zinc salt is present in DECILDERM Ointment and Powder (Duncan), and appears to be the most effective of these acids for fungus infections. Decilderm Ointment and Powder (Duncan) are easy to apply and the odour of undecylenic acid is hidden by a perfume.

DECILDERM OINTMENT (Duncan) containing undecylenic acid 5%, zinc salt 20%, in 1 oz. tubes. DECILDERM POWDER (Duncan)

containing undecylenic acid 2%, zinc salt, 20%, in 11 oz. sprinkler tins.

Ransoms are specialists in the truest sense of the word . . . specialists not only in the production of vegetable drugs and galenicals, but also in the cultivation on their own farm of numerous medicinal plants. They therefore have a specialist's eye for detail—the all-important details of processing that contribute so much to the quality of the final product. So when next taking delivery of vegetable drugs and galenicals, keep an eye on the container labels — just to make sure you're receiving a Ransom product. It's a detail well worth watching!

DRUG PRICING and telephone order cle (female) required by South-east London hour Five-day week. Canteen facilities, Details experience to Box C 6519.

EXPERIENCED REPRESENTATIVE used

EXPERIENCED REPRESENTATIVE used calling on wholesale and retail chemists, har ware and large stores, required for West Le cashire, part Cheshire and North Wales leading manufacturers whose products inclu Suba Seal Hot-water Bottles, Baby Feedi Requisites and Suba Maid Domestic Produc Progressive position, good salary, commissi and expenses, Applications stating age, expence and present territory to William Freem & Co., Ltd., Suba Seal Works, Peel Stre Barnsley, Yorkshire.

GENATOSAN LIMITED A member of the Fisons Group of Companies

is about to open a Packaging Development laboratory within the Pharmaceutical Development Department and has a vacancy for a suitably qualified person to take charge. The work will comprise the selection of packaging materials, mainly for new products, but will not deal with matters such as external decor; it will involve liaison with other development staff, understanding of the types of product handled and extensive study and shelf-life testing of various packaging materials. A pharmacist with some experience of pack testing could probably fill this post satisfactorily, but others who are interested in the proposition are invited to apply. New laboratories are being constructed and excellent working conditions prevail. A commencing salary of not less than £850 per annum is envisaged (depending on age, qualifications, and experience) and a contributory pension scheme operates. Applications giving brief personal details should be ad-

scheme operates. Applications giving brief personal details should be addressed to the Personnel Officer, Genatosan Ltd., 12 Derby Loughborough, Leicestershire, quote Ref.: 21.

MEDICAL DEPARTMENT EXECUTIVE quired by prominent pharmaceutical comin London area, Duties include inter alia opiling and editing of medical literature initiation of clinical trials. Medical qualifition an advantage, but not essential if areant has appropriate background and experience. Salary £1,250 upwards commensurate qualifications and experience. GENATOSAN LIMITED A member of the Fisons Group of Companies

Companies

requires a Pharmacett to fill a vacancy in the Pharmaceutical Development Department. Experience in the development of pharmaceutical specialities, especially tablets, would be advantageous, but keenness to enter this field would be taken into account, The work is mainly concerned with new products and calls for skilful laboratory methods along with a sound appreciation of recent trends.

A commencing salary of not less than £850 per annum is envisaged and a contributory pension scheme is operated. Applications giving brief personal details should be addressed to the Personnel Officer, Genatosar Limited, 12 Derby Road, Loughborough, Leics. Please quote Ref. 20

SALES MANAGER

YARDLEY & CO. LTD., require SALES MANAGER for the Home market, LONDON OFFICE. Candidates must be in a position to demonstrate a successful record of sales management and control of a sales force of high calibre representatives.

Essentials for this important executive position are: thorough knowledge of the market, and marketing methods, and practical experience of direct selling of perfumes, cosmetics, soaps and toiletries to high grade stores and chemists. This is not a position for which a man is to be trained; it is one for a personality who has acquired the stature which is necessary, and is already in receipt of salary at least £2,500 per annum. Only those who are confident they can demonstrate, without question, their claim to possess those qualities should apply, by letter only, please. Calls by telephone, or in person will not, in the first instance, qualify for consideration.

Applications, addressed Yardley & Co. Ltd., 33 Old Bond Street, London, W.1, and marked—Confidential; Y.D.2., will be considered, in strictest confidence by the Sales Director of the Company.

COXand Coating

The bond between the COX Organisation and the art of coating tablets for the needs of pharmacy is a real one and goes back a hundred years. In 1854 ARTHUR HAWKER COX the founder of this house invented pearl coating.

Since those days sugar coating has superseded pearl coating and has been perfected in the extensive Brighton plant by a matured technique and a traditional craftsmanship of a very high order.

Tablets made and coated by the COX Organisation are now serving pharmacy and the medical profession in all parts of the world.

ARTHUR H. COX & CO. LTD. BRIGHTON • ENGLAND

Makers and coaters of the world's finest tablets
